

Portfolio

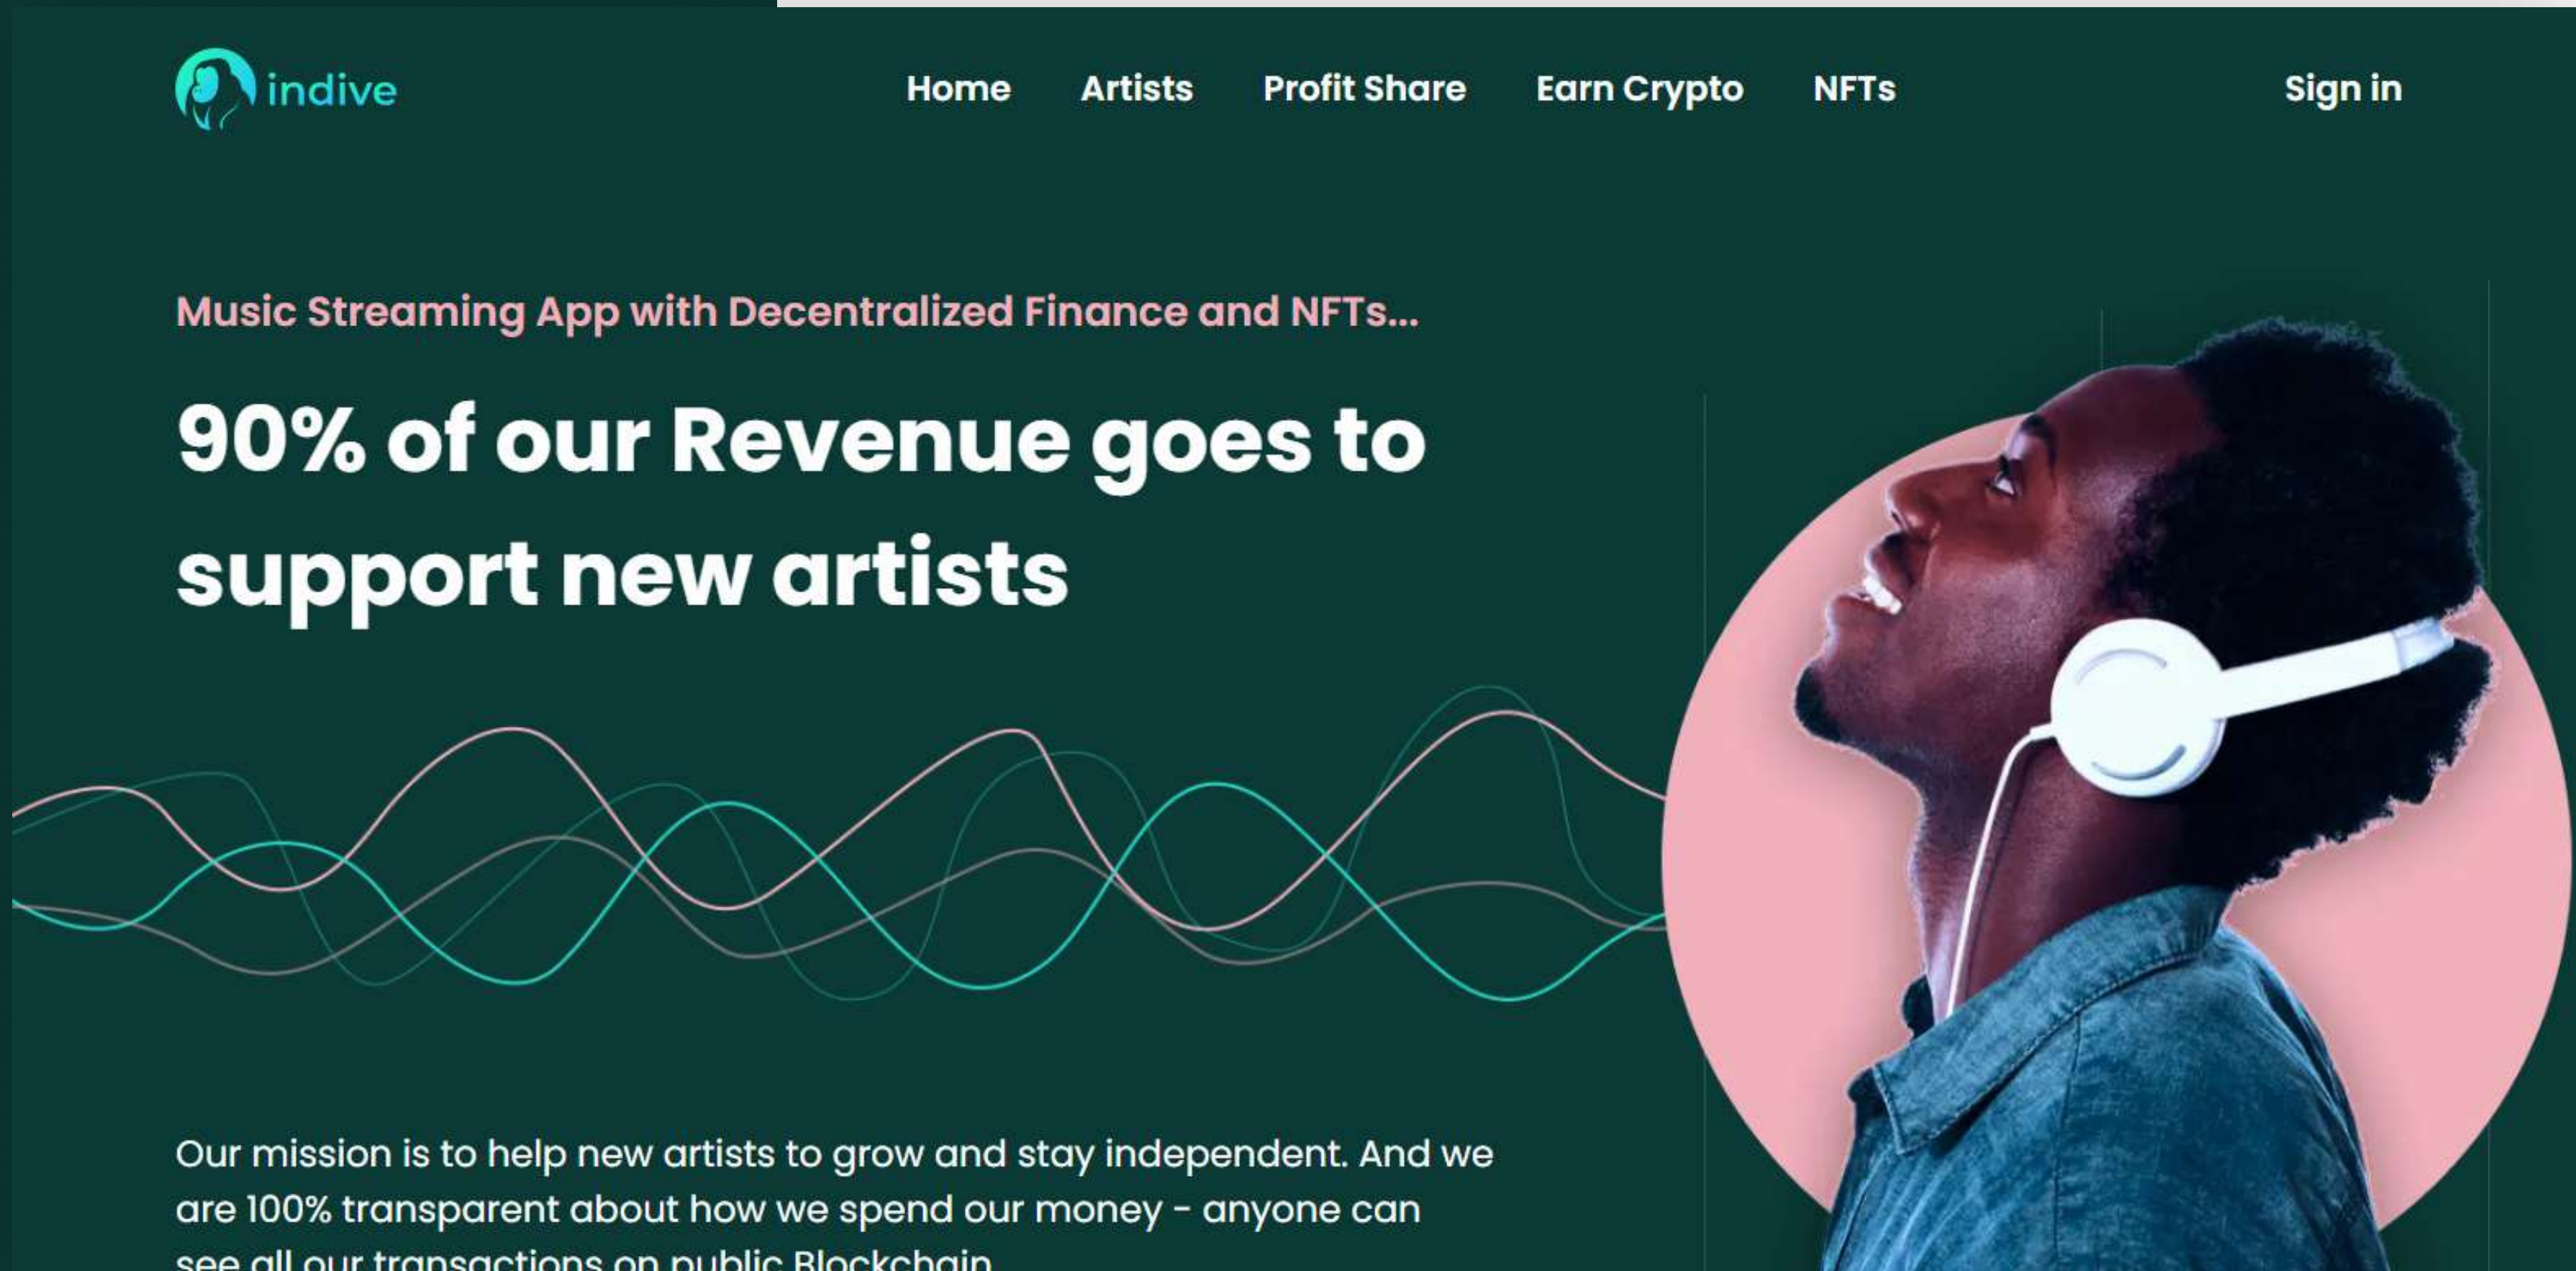

DEVTEAM

INDIVE

Client

Indive is a decentralized music streaming app that shares its profits with artists and listeners.

Link

www.indive.net

Technologies and tools:

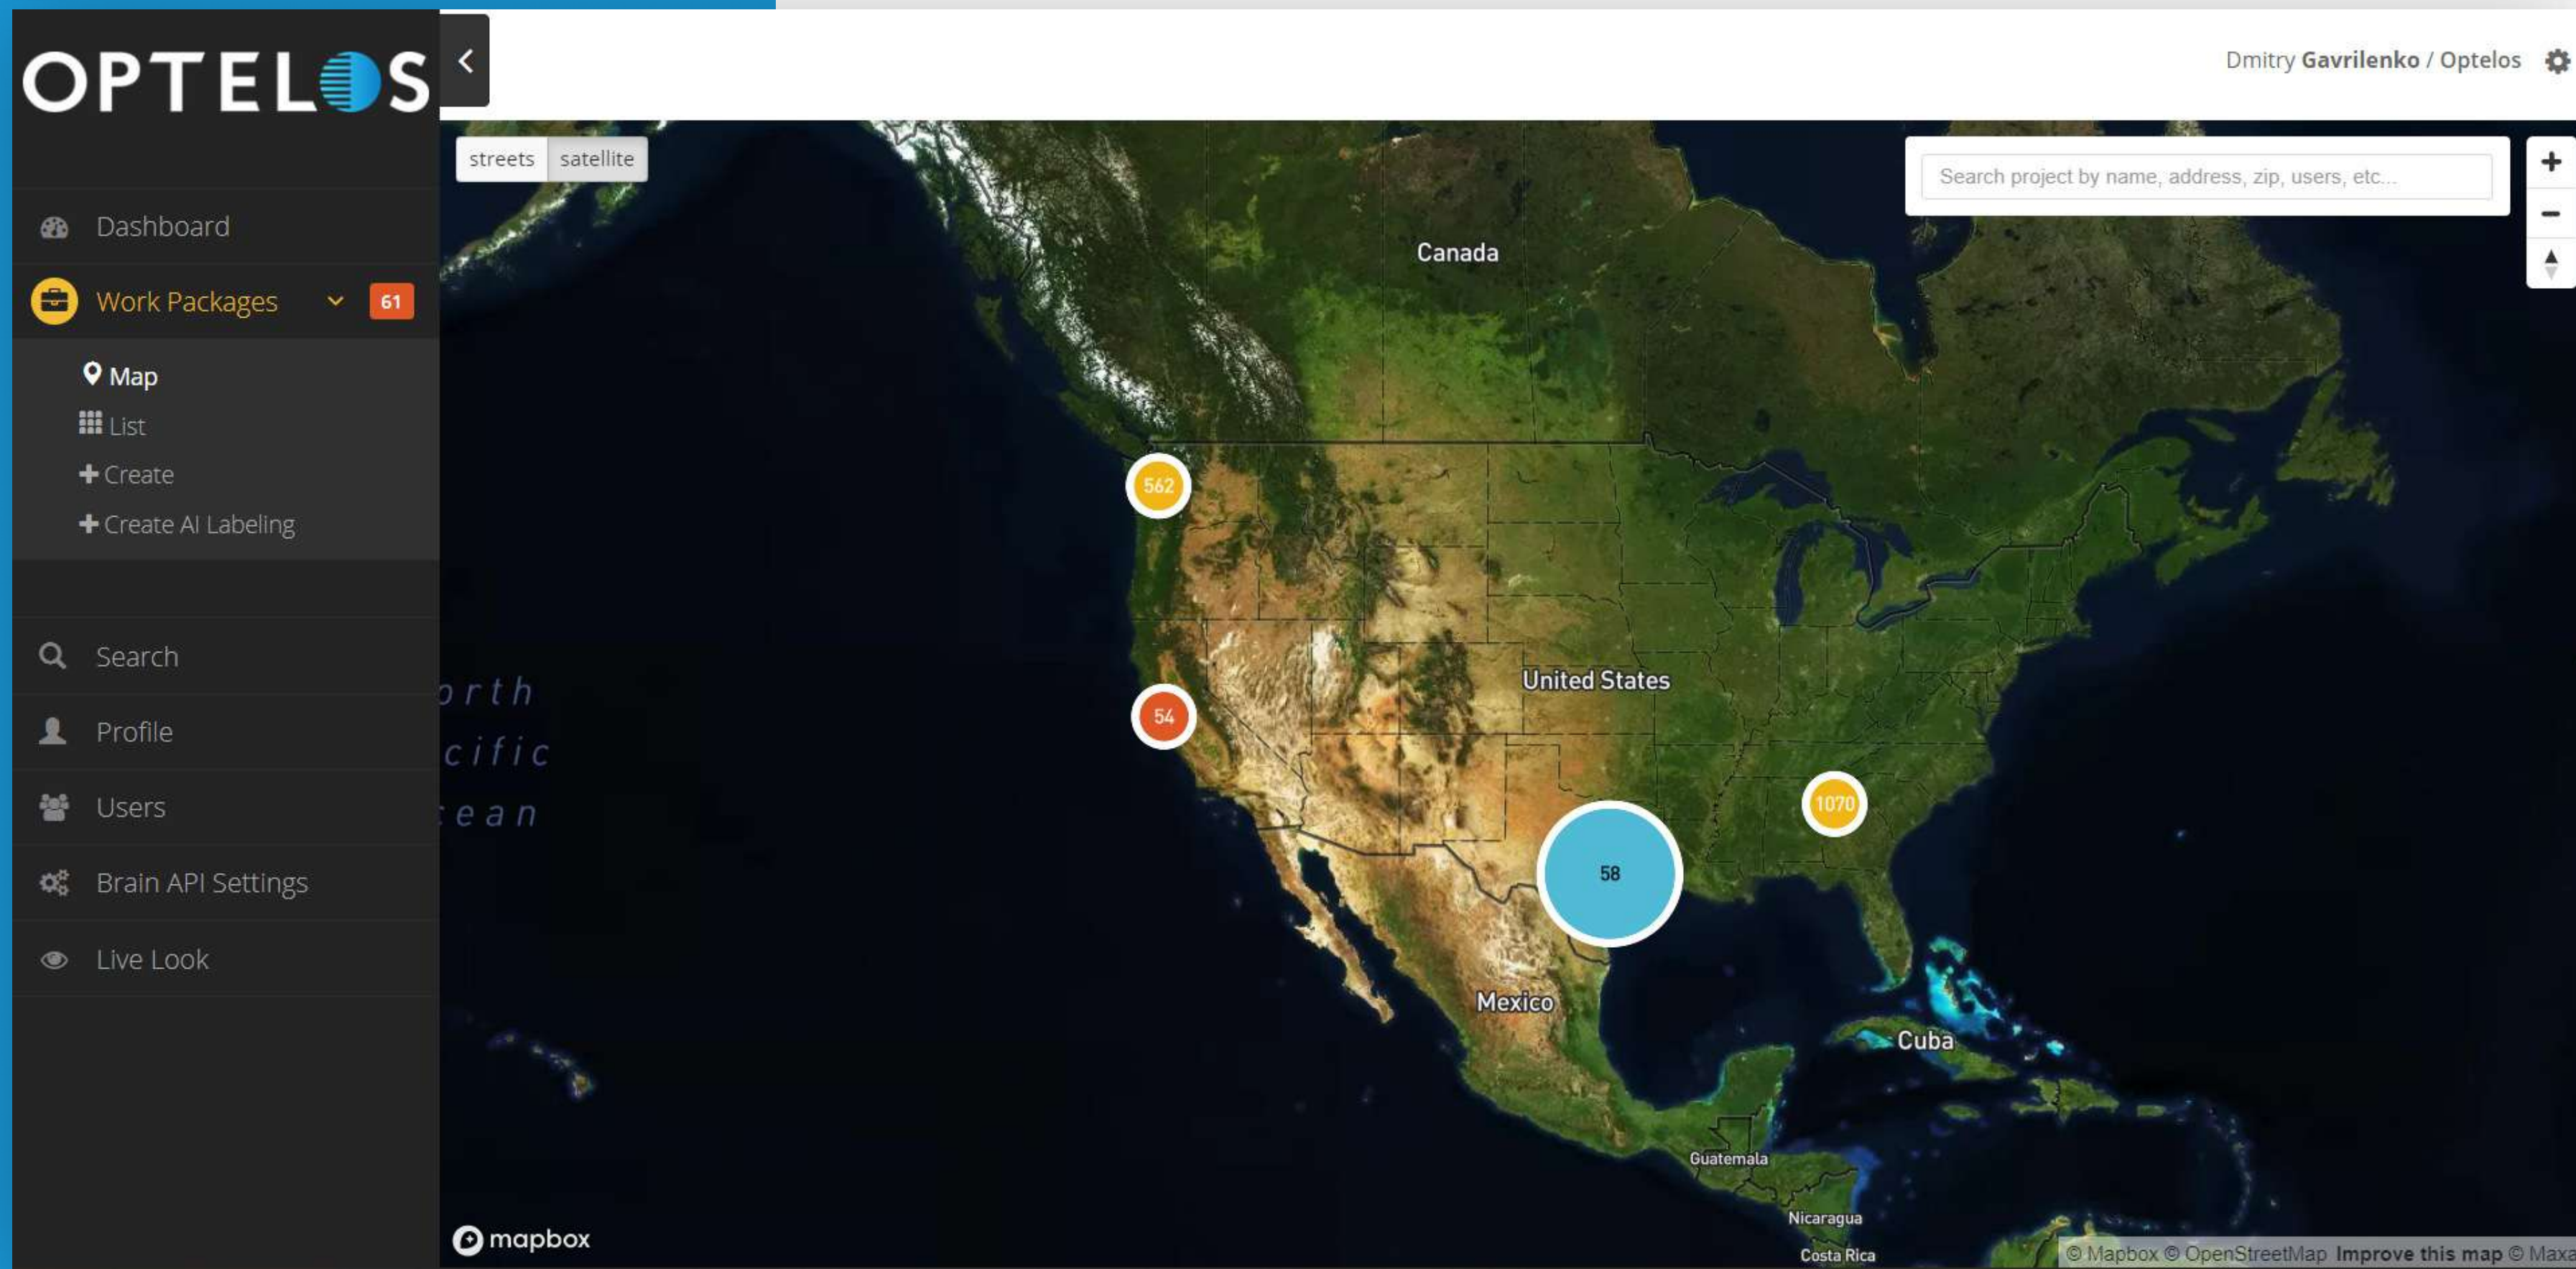

Challenge

The task is to develop a reach ecosystem of apps integrated with the Cardano Platform: iOS and Android mobile apps, Artists Web Portal, SEO optimized landing page, custom UI/UX design, Apple and Android Watches, and Apple CarPlay and Android Auto compatibility. All the apps are integrated with Plutus-based Cardano Smart Contracts and run on a custom utility token.

OPTELOS

Client

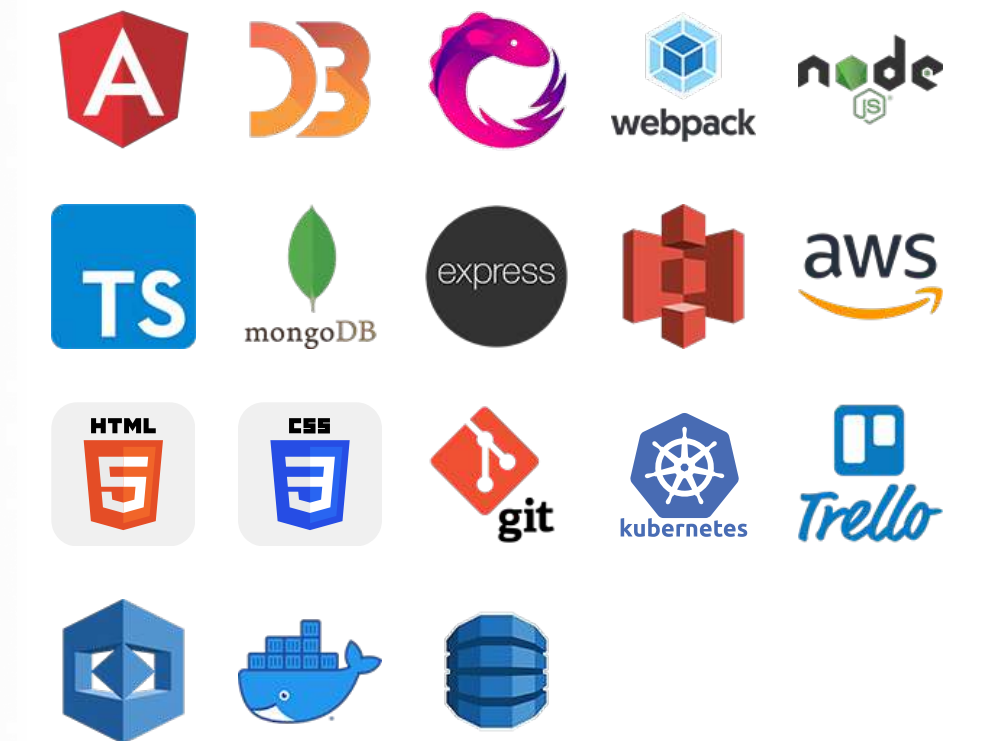

A data management and AI analytics platform for transforming geovisual asset inspection data into actionable insights

Link

www.optelos.com

Technologies and tools:

Challenge

Our task is to integrate a template of the admin panel into an existing system and to provide high scalability for some parts of the app by separating them into microservices. The admin panel is used for data visualization gathered from multiple data sources with the help of AI algorithms. The project requires complex work with 3D graphics to display various charts and statistics.

PIECES

Client

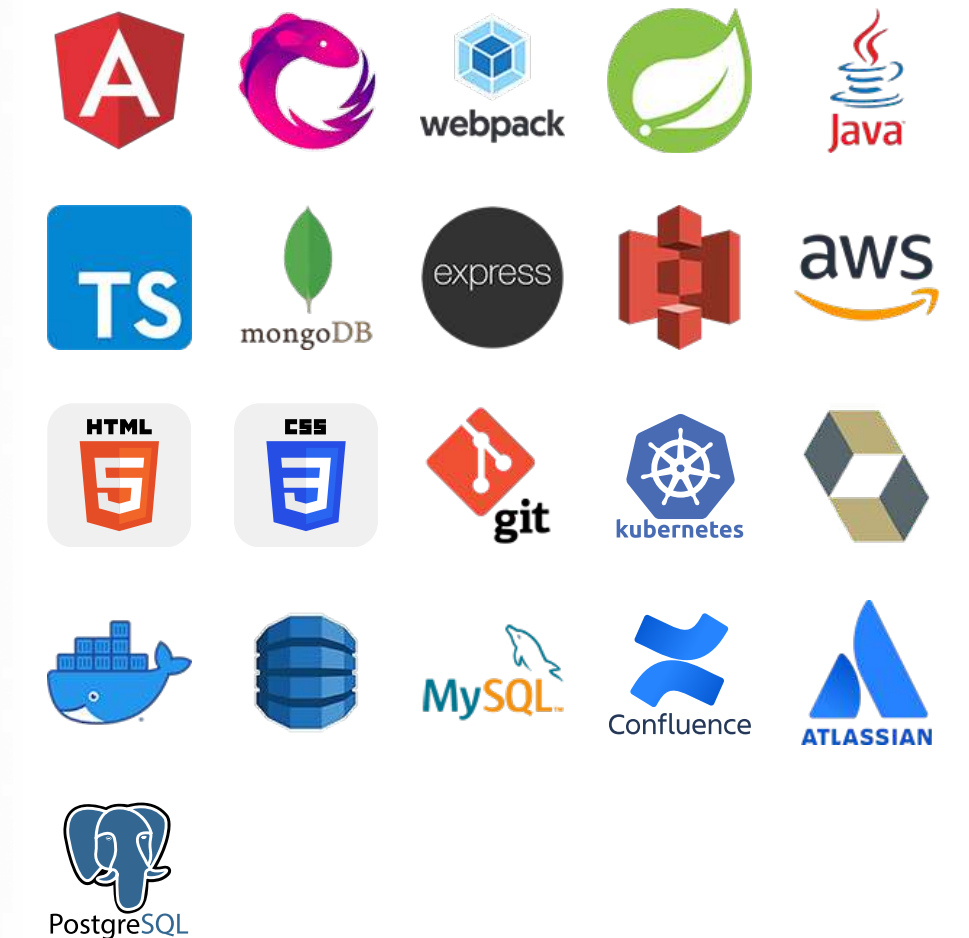

Pieces Technologies offers healthcare artificial intelligence platform that connects health systems and the community to address clinical and social determinants of health through networks and intelligent software and services.

Technologies and tools:

Challenge

Our task is to support the client's team and help with various challenges across multiple projects. The legacy code has been refactored and updated. Numerous apps have been implemented from scratch, including a shared design system. Backend functionality is being redesigned to use microservices instead of a monolithic approach to make the backend easily scalable and load resistant.

Client

Real estate lending marketplace with a minimum of £100 million of discretionary capital at any given time.

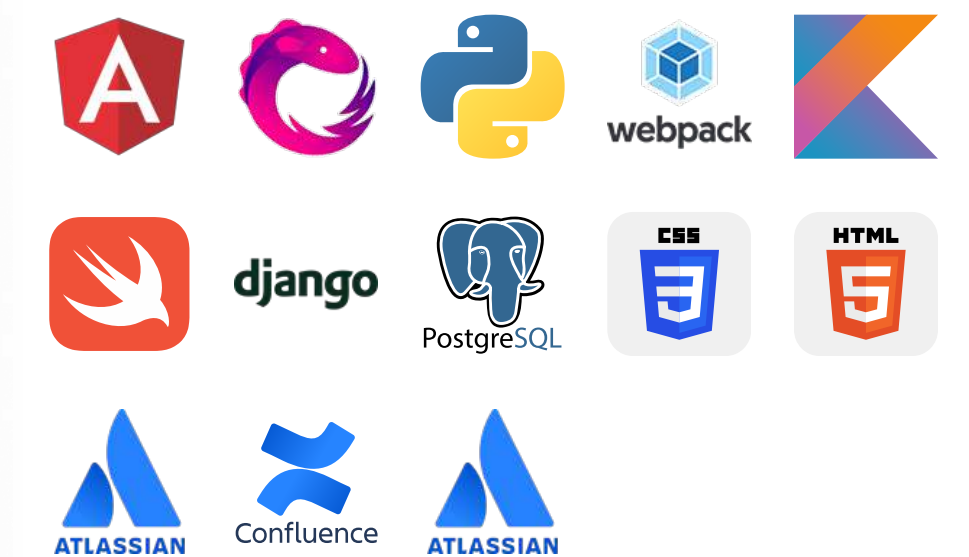

The screenshot displays the 'Welcome Lender' interface. On the left, there are four chat messages from '@Peter Matthews' dated 15/02/2020 at 13:30, providing information about the asset-backed lending marketplace and how to access it. The main area is divided into two sections:

- Your Investment Criteria:** A form with sections for:
 - Location:** Mixed, Greater London, Prime Central London, Prime East London, Prime North London, Prime West & South West, Super Prime.
 - Security:** 1st Charge, 2nd Charge.
 - Borrower:** UK resident(s), Non-UK resident(s), Corporate borrower(s).
 - Transaction:** Interest payments (Serviced/Paid monthly, Rolled, Hybrid), Term (months) (1, 36), Loan Amount (£131,232, max £), Max Gross LTV (75%).
- Here's what loans your criteria would select:** A grid of loan cards from a recent portfolio. Each card shows a property image, location (London, London), loan amount, term, LTV percentage, and property details (sq.ft., Leasehold/Freehold).

Link

www.brydg.com

Technologies and tools:

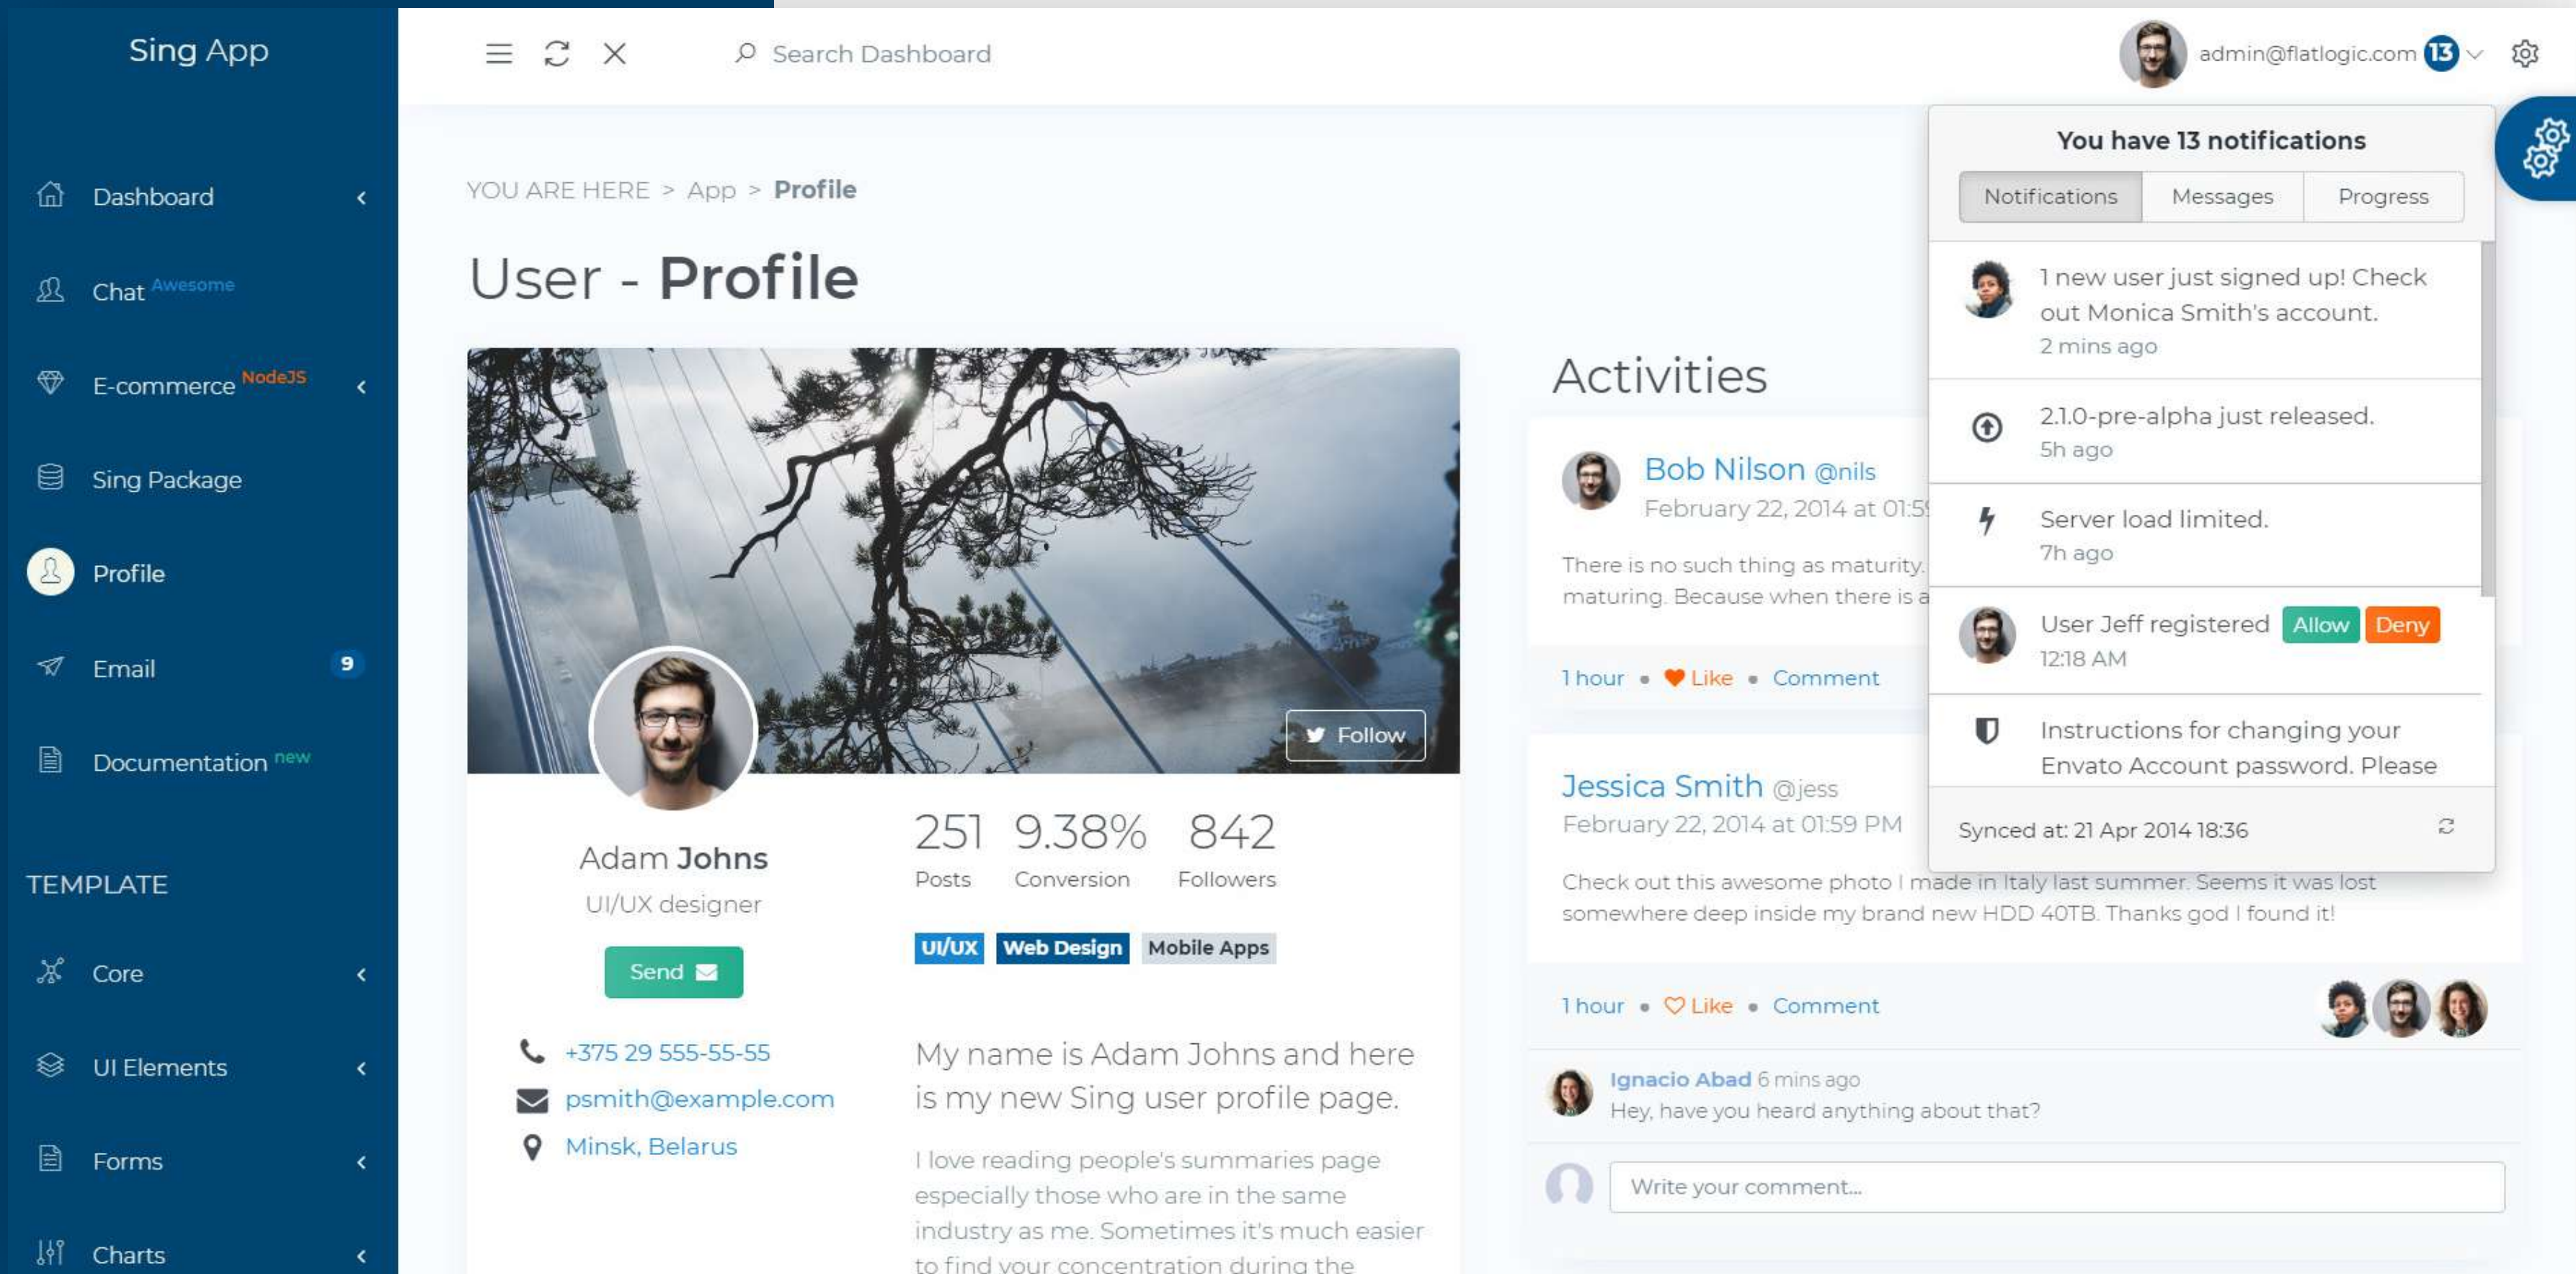

Challenge

The project is an implementation of a complex role-based property financing system and marketplace solution with real-estate lending flow automation. Real-time chat and video communication, document management and signing workflow (recognized as legally binding), and integrations with multiple 3rd-party APIs are available through the app.

SIGN APP

Client

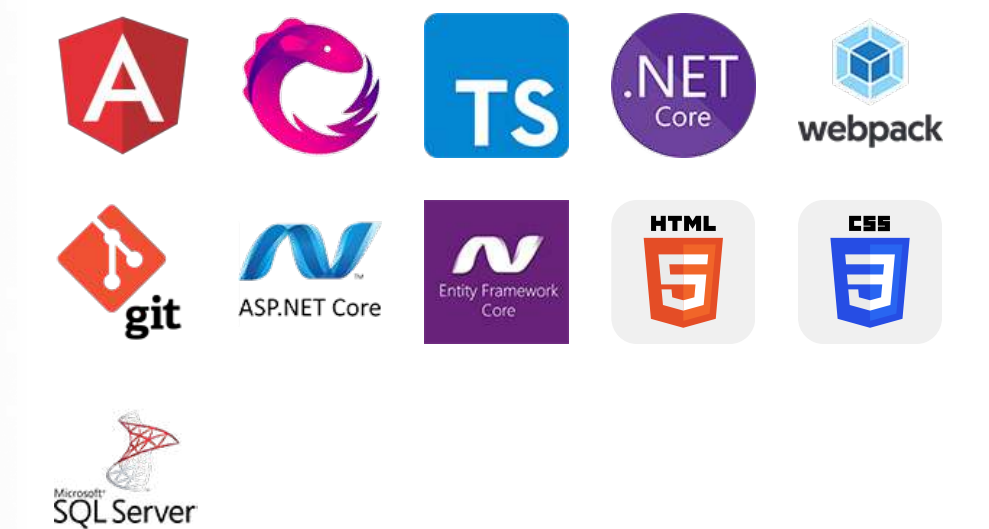

Flatlogic simplifies web and mobile development for their clients with the help of professionally designed web & mobile application templates built with React, Vue, Angular, React Native and Bootstrap.

Link

www.flatlogic.com

Technologies and tools:

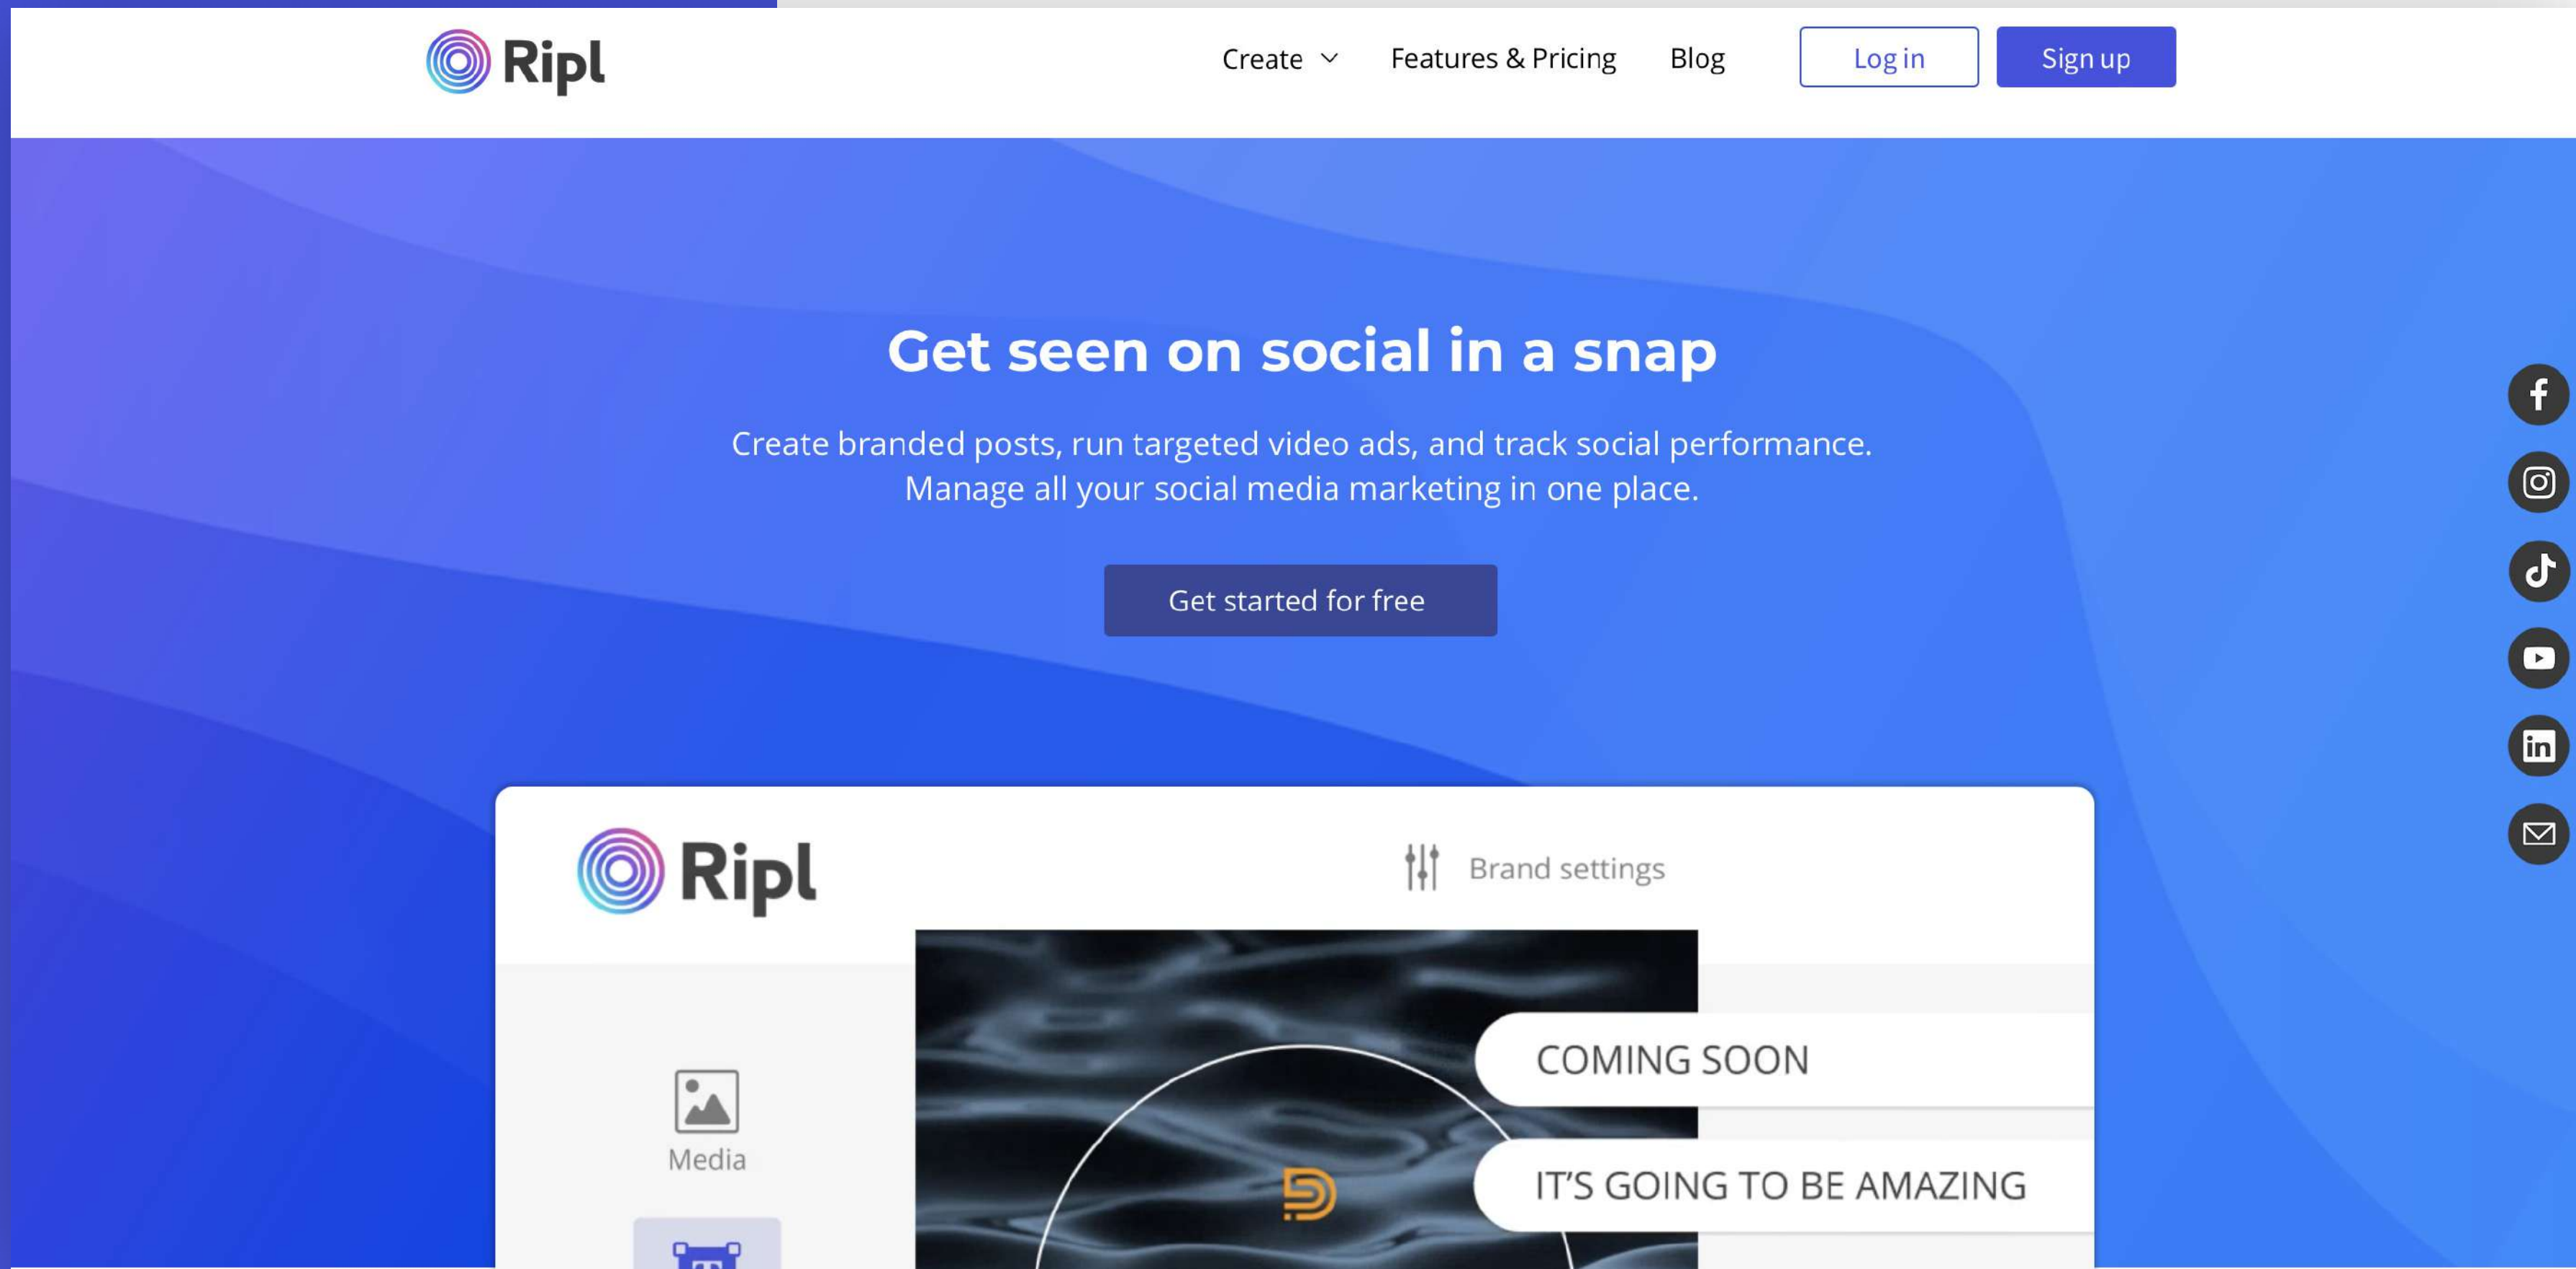

Challenge

The task was to provide an "out-of-box" admin dashboard template based on Angular and .NET Core frameworks. The template's purpose is to minimize the time required to develop internal admin dashboards. One of the priorities was to provide the highest level of code reusability for developers who will purchase the template.

RIPL

Client

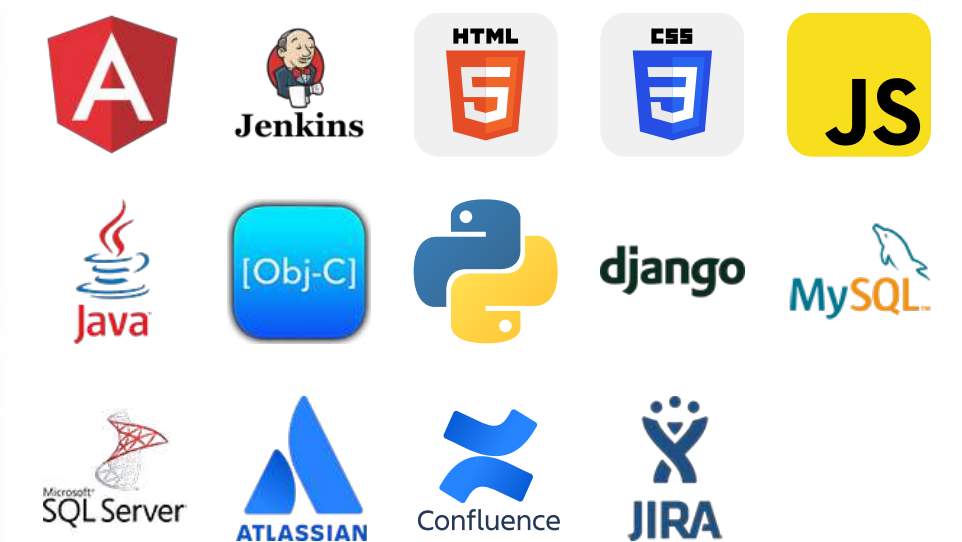

Ripl is a product that helps you to create branded videos and images in minutes, and then instantly post to all your social media accounts at once.

Link

www.ripl.com

Technologies and tools:

Challenge

Ripl provides 3 different apps to its users: an Android app, an iOS app, and a Web application. Our task is to provide a QA team responsible for regression testing and guarantee the product's highest quality and bug-free releases. Another task is to help the Ripl team with additional customer support members available during the hours when the main team is out of reach.

ENCORE ACCESS

Client

The client is a ticket exchange and resale company with an access to more than 120,000 upcoming live concerts, sporting events & theater productions.

The screenshot displays the Encore Access application interface. On the left, there is a 'Venues' sidebar with a list of venues, including Radio City Music Hall, Madison Square Garden, Grand Chapiteau At Marymoor Park, Kennedy Center Opera House, Allstate Arena, Red Rocks Amphitheatre, Belk Theatre at Blumenthal Performing Arts Center, Amway Center, Golden 1 Center, PPG Paints Arena, SAP Center, Greensboro Coliseum At Greensboro Coliseum Complex, and Northwell Health at Jones Beach Theater. The main area shows a detailed view of Madison Square Garden, 33 4 Pennsylvania Plaza, New York, NY, 10001. It includes an 'Add' button, an 'Ignore Venue' button, and a table of event data. The table is divided into 'Local Data' and 'External Data' sections. Both tables have columns for Exchange Id, Event Date, Event Name, Venue Name, Cancelled, Mapped, and Mapped To. The 'Local Data' table shows events like 'New York Rangers vs. Philadelphia Flyers' and 'New York Knicks vs. Charlotte Hornets'. The 'External Data' table shows events like 'NBA Preseason - Milwaukee Bucks at New York Knicks' and 'NBA Preseason - Washington Wizards at New York Knicks'. Each row in both tables has a red 'X' in the 'Cancelled' column and an 'Ignore' button in the 'Mapped To' column.

Link

www.encoreaccess.com

Technologies and tools:

Challenge

The tasks are to support the existing legacy system and features, an incremental update of the legacy system with the latest technologies, analysis of the current system to find new business automation opportunities and reduce the amount of manual work as much as possible. Numerous Big Data challenges have been met and solved.

BRANDGEN

Client

BrandGen.io is a self-service digital advertising platform that enables B2B firms and their marketing partners to accelerate sales and revenue growth through targeted, cost-effective marketing campaigns

The screenshot displays the BrandGen.io web application interface. At the top left is the logo "BrandGen" with the tagline "powerup your flywheel". The main content area is divided into two sections: "Account information" and "Campaigns Dashboard".

Account information: This section shows details for a "Munibilling" account. It includes a dropdown menu for the account name, a table of account details, and a payment method section.

BrandGen Advertiserid	Created by	Domain	Address	Phone Number
bgAdvertiser-cc4df250-bcc4-44c5-a358-cba7b961a378	advertisingeea	www.munibilling.com	Address 1: 3300 Battleground Ave. Address 2: Suite 402.	5405294870

Below the table, there are two payment-related sections: "HubSpot Account" with ID 8516827 and "Current Selected Card" (Amex 1093) with card name "Kelly's AMEX".

Campaigns Dashboard: This section shows a campaign named "MB - ABM Experiments - 11.1...". It includes filters for "Time Frame" (7 Days) and "Campaigns" (MB - ABM Experi...). There are buttons for "Edit Campaign Details" and "Copy Conversion Pixel".

Status	Name	Start Date	End Date	Uploaded Accounts	Clicks	Click Through Rate	Impressions	Budget Spent	CPC (USD)	CPM (USD)	Conversions	Sp Cc
INACTIVE	MB - ABM Experi...	11/16/2022	12/31/2022	30	2	0.21%	964	\$55.38	\$27.69	\$57.45	N/A	\$0

Link

www.brandgen.io

Technologies and tools:

Challenge

The task is to build an Account-Based Marketing platform that supports seamless integration with HubSpot API, Beeswax bidder, and multiple other APIs. Users should be able to add and remove target campaign accounts and control target advertising strategies. The tech team is also challenged to provide modern UI/UX design with responsive and scalable functionality.

CASERM

Client

CaseRM enables you to collaborate with other professionals inside and outside your organization. Easy share and collaborate on case files, manage people who can access case files. Manage multiple calendars of events, access to calendars of other people and share your own calendars with them.

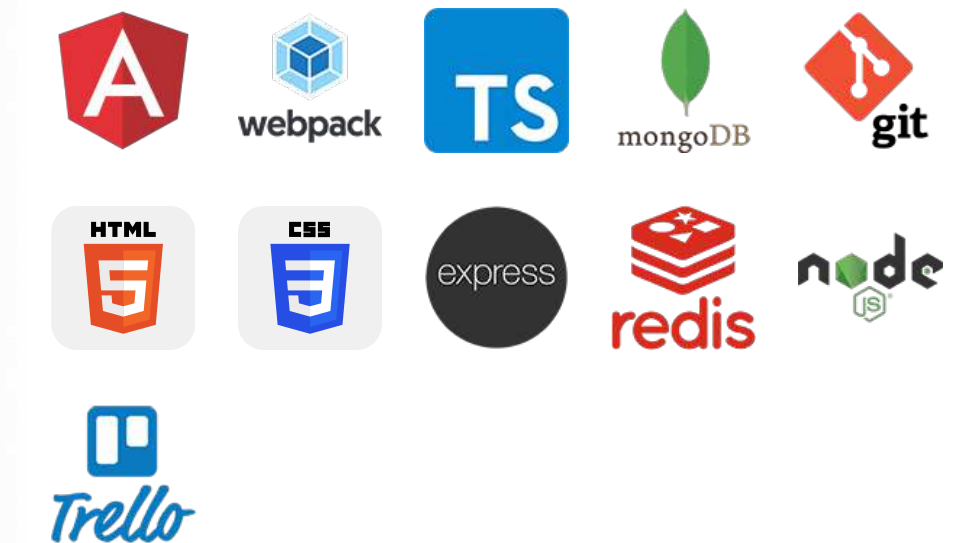

The screenshot shows the CaseRM web application interface. On the left is a sidebar with navigation options: 'New Case-File', 'All Case-Files', 'My Case-Files', 'Shared with me', 'Starred', and 'Trash'. The main content area displays a table of case files for 'Brampton Physio' (Sample Physio 404). The table has columns for CASE ID, CASE-FILE NAME, TYPE, HOME BRANCH, and LAST UPDATED. The row for CASE ID 40, 'Peter Rupert', is highlighted.

CASE ID	CASE-FILE NAME	TYPE	HOME BRANCH	LAST UPDATED
42	Harry Rosen	EHC	Brampton Physio	Dec 01, 2015
41	Jason Bolac	EHC	Brampton Physio	Oct 30, 2015
40	Peter Rupert	MVA	Brampton Physio	Oct 18, 2015
37	Gerard Butler	WSIB	Brampton Physio	Sep 03, 2015
36	Meg Ryan	EHC	Brampton Physio	Sep 03, 2015
34	Antonio Banderas	EHC	Brampton Physio	Sep 03, 2015
32	Scarlett Johansson	Private	Brampton Physio	Sep 03, 2015
31	Jack Nicholson	EHC	Brampton Physio	Sep 03, 2015
30	George Clooney	EHC	Brampton Physio	Sep 03, 2015
29	Catherine Zeta-Jones	WSIB	Brampton Physio	Sep 03, 2015
28	Richard Gere	Private	Brampton Physio	Sep 03, 2015
27	Matt Damon	WSIB	Brampton Physio	Sep 03, 2015
26	Vin Diesel	MVA	Brampton Physio	Sep 03, 2015
25	Keira Knightley	MVA	Brampton Physio	Sep 03, 2015

Link

www.caserm.com

Technologies and tools:

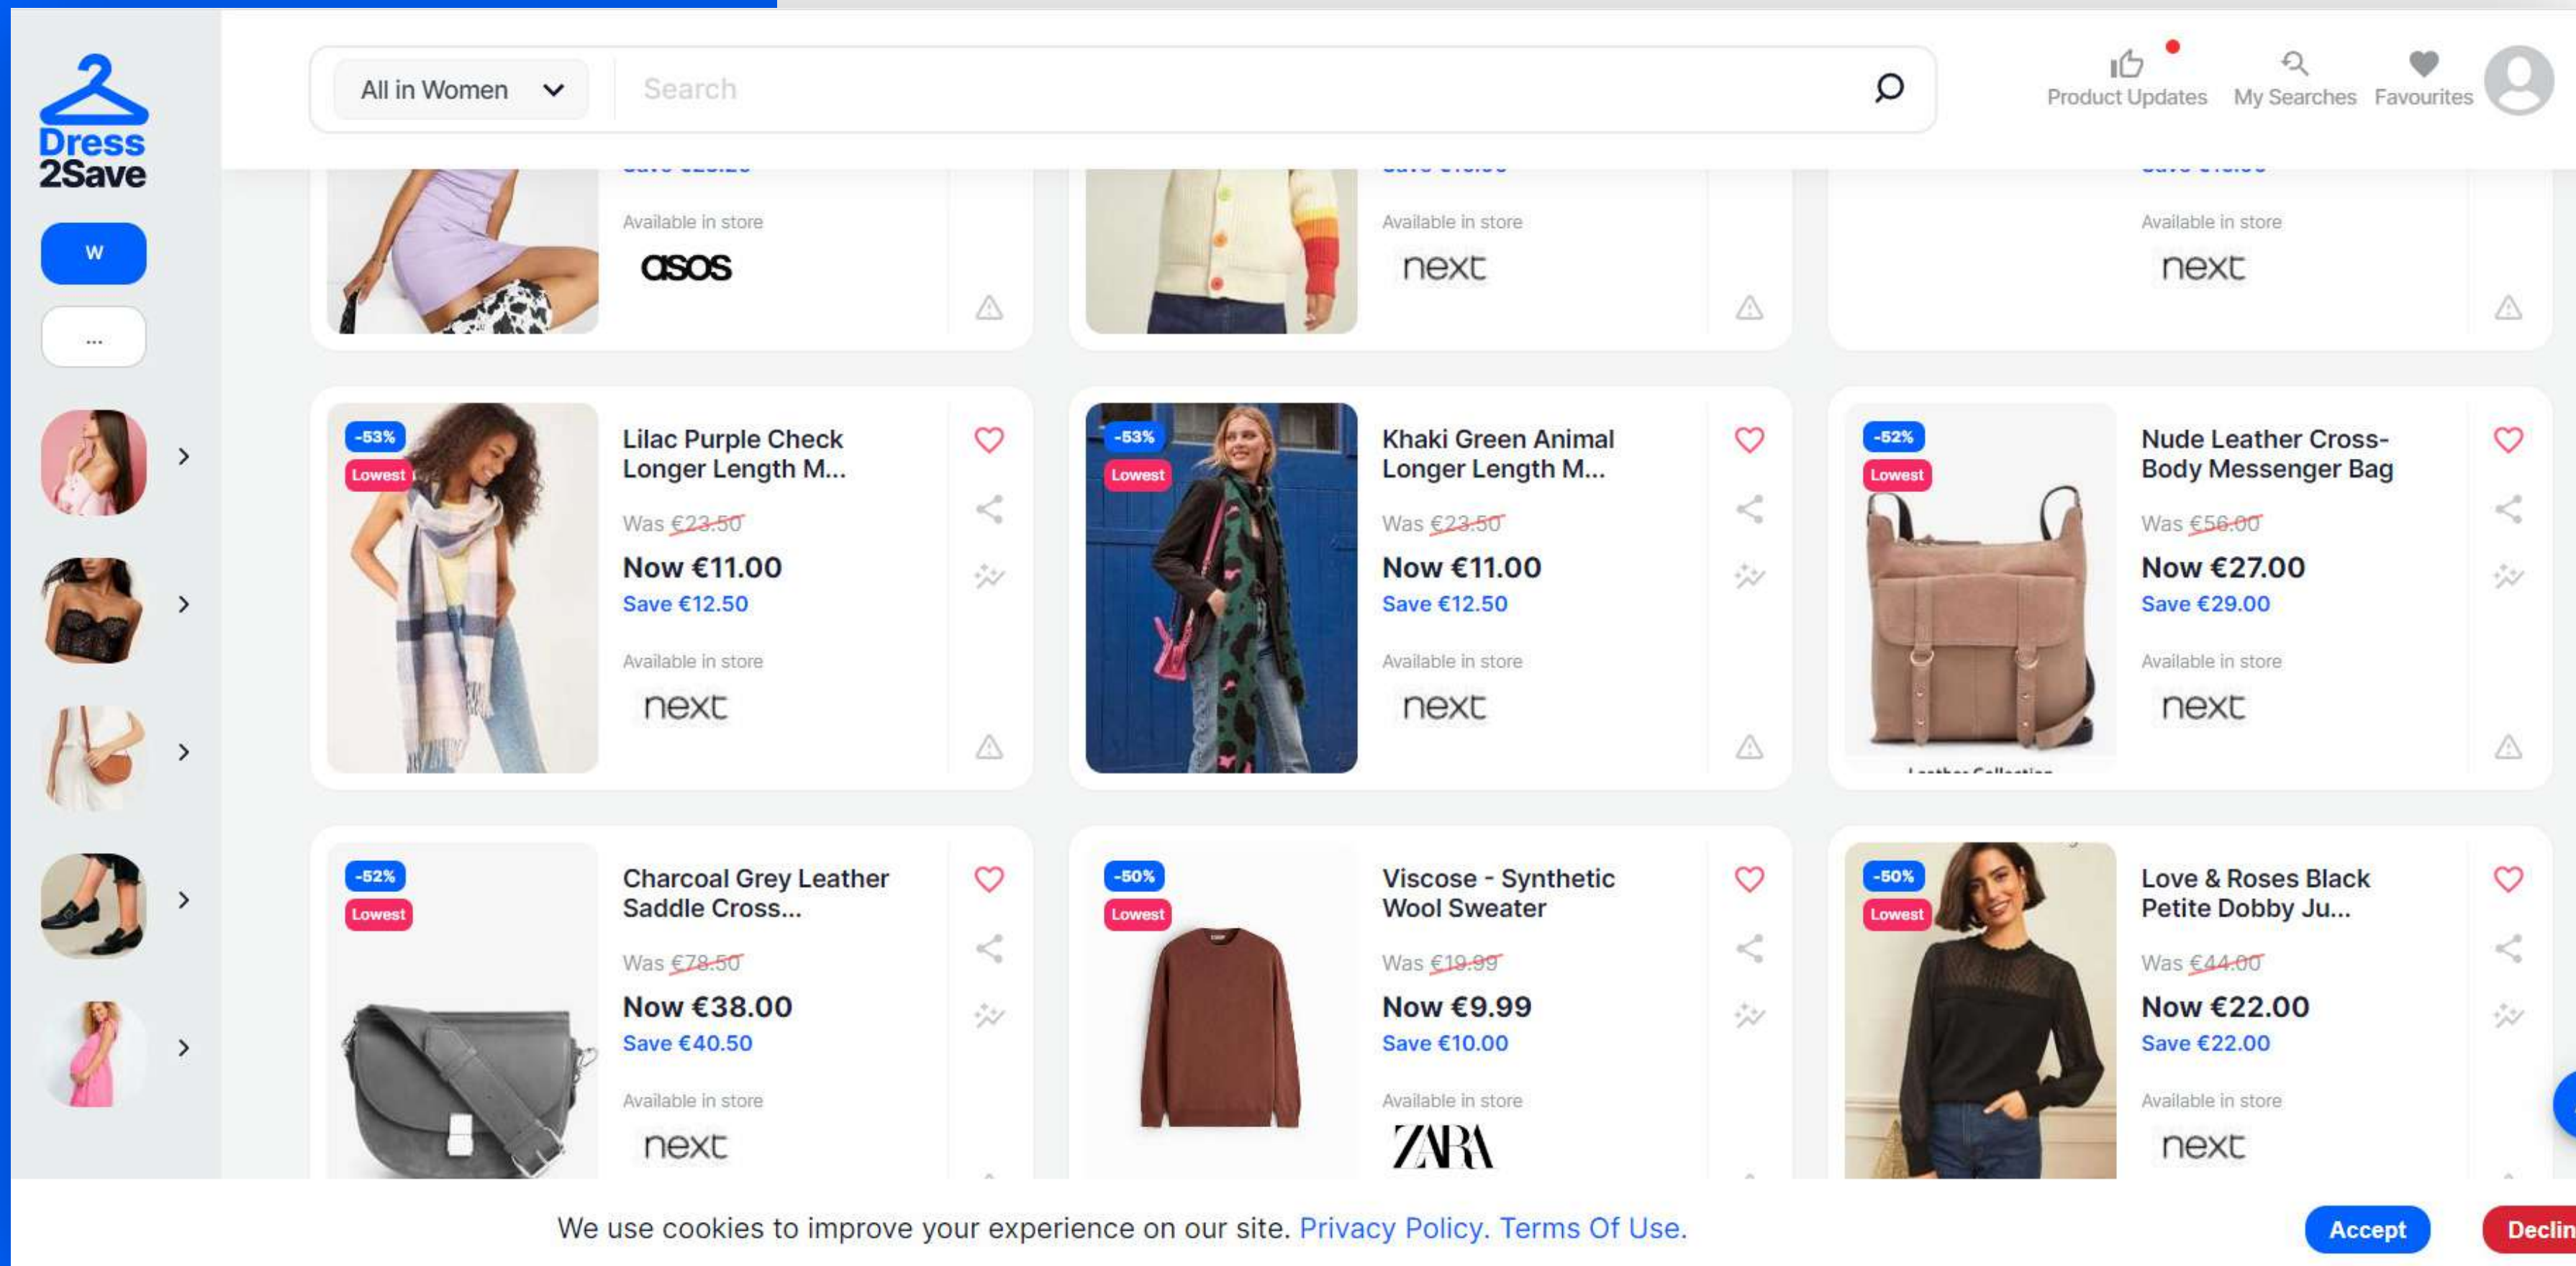

Challenge

The project is a dashboard for the collaboration and sharing of documents, files, and calendars between employees of different organizations. All files are automatically uploaded and backed up in Cloud-A storage, a Canadian-based cloud solution that meets requirements within Canadian laws such as Canadian PIPEDA. The most significant concerns of the project are security and data safety.

DRESS2SAVE

Client

Dress2Save is an online clothing price aggregator that helps users analyze historical price data of clothing items and find the moments when the items are on sale.

Link

www.dress2save.ie/daily-offers

Technologies and tools:

Challenge

The main challenge of the project is a scalable data-gathering process that extracts data from multiple sources and stores it in a local database in a secure manner. The website should be responsive but also should be optimized for search engines. That required not only the implementation of a classic React-based SPA but also a server-side rendering for search engine crawlers.

CLEANETTO

Client

Cleanetto marketplace - a cleaner-specific hiring platform that brings together cleaning companies, their clients and cleaners.

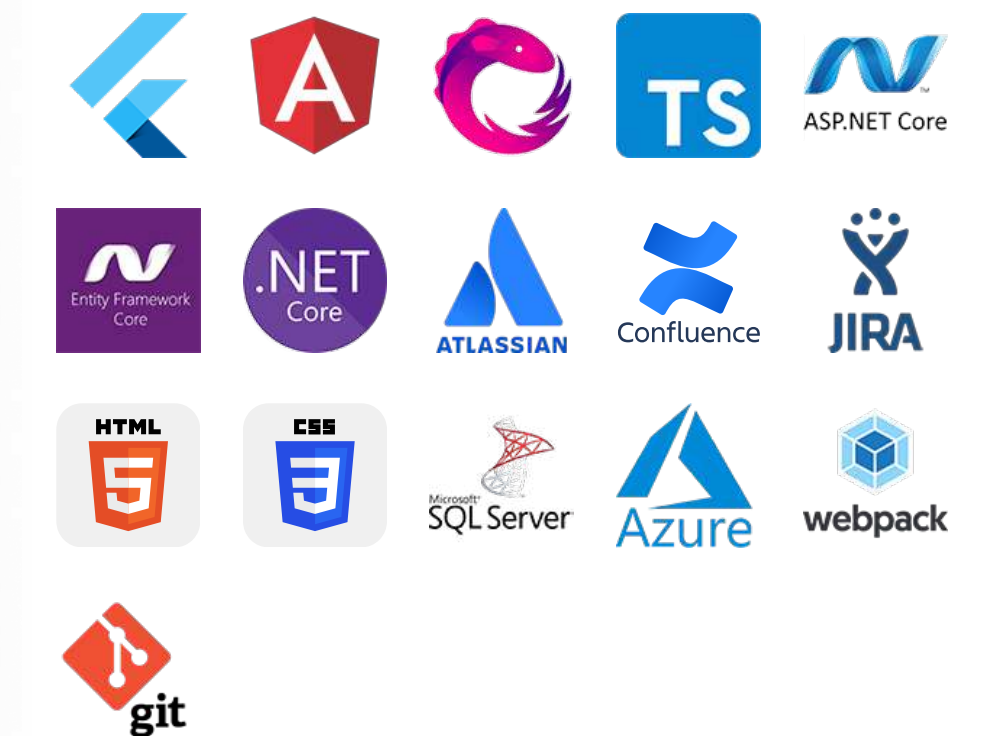

The screenshot displays the Cleanetto web application interface. On the left is a dark sidebar with a user profile for Miguel Zabudovsky (miguel@slatenyc.com) and a menu of pages including Dashboard, Reports, Calendar, Map, Clients, Cleaners, Bookings, Tasks, Apps, Settings, and Onboarding. The main content area shows a calendar for February 2020, with a table of cleaning tasks. The table has columns for dates from 08 Feb to 15 Feb and rows for individual cleaners: Bartola Delgado, Doris Sanchez, Joana Aguirre, Elsa Benitez, Lady Calixto, Esthefany Castro, Glendhy Castro, Raquel Castro, Elizabeth Garcia, Maira Giovanni, Miriam Lopez, Maria Luna, Noelia Merlin, Judith Morales, Maritza Mosquera, and Lupe Vera Rivera. A 'Total' row and a 'Tips' row are at the bottom. A 'Download' button is visible in the top right of the calendar area.

Date	Bartola Delgado	Doris Sanchez	Joana Aguirre	Elsa Benitez	Lady Calixto	Esthefany Castro	Glendhy Castro	Raquel Castro	Elizabeth Garcia	Maira Giovanni	Miriam Lopez	Maria Luna	Noelia Merlin	Judith Morales	Maritza Mosquera	Lupe Vera Rivera

Link

www.cleanetto.com

Technologies and tools:

Challenge

The task is to implement a multi-tenant SaaS platform for the cleaning industry that helps to automate the daily processes of a typical cleaning company: client on-boarding processes, cleaning events scheduling, cleaners management, events scheduling with automatic cleaner assignment, providing statistical information and reporting capabilities, monthly and one-time subscriptions

Client

The Henyep Group is a global corporation with a diversified portfolio of businesses spanning Asia, Europe and the Middle East. With a 40 year history, the Group has positioned itself as a leader in each of its core businesses, offering a combination of expertise and integrity to its clients and the community as a whole.

The screenshot shows the HYCM website interface. At the top, there is a navigation bar with links for 'Henyep Group', 'Partnership', 'Help Center', 'Login', 'Live chat', and 'English'. Below this is a secondary navigation bar with 'About Us', 'Trading', 'Tools', and 'Education', along with an 'Open An Account' button. The main content area features a large banner with the text 'TRADE WITH A MULTI-REGULATED BROKER' and 'Providing trading services since 1977*'. A prominent red button labeled 'Open Live Account' is positioned on the left. Below the banner, there is a section titled '40+ Forex' with a sub-header 'Trade one of the world's most liquid asset class. Choose from our large range of currency pairs.' and 'Maximum leverage 1:500'. To the right of this section are three line charts for USD/CAD, EUR/JPY, and NZD/USD, each showing bid and ask prices. At the bottom of the screenshot, a cookie consent banner is visible with the text 'This website uses cookies to enhance your user experience. Amend your preferences here' and an 'I agree' button.

Link

www.flatlogic.com

Technologies and tools:

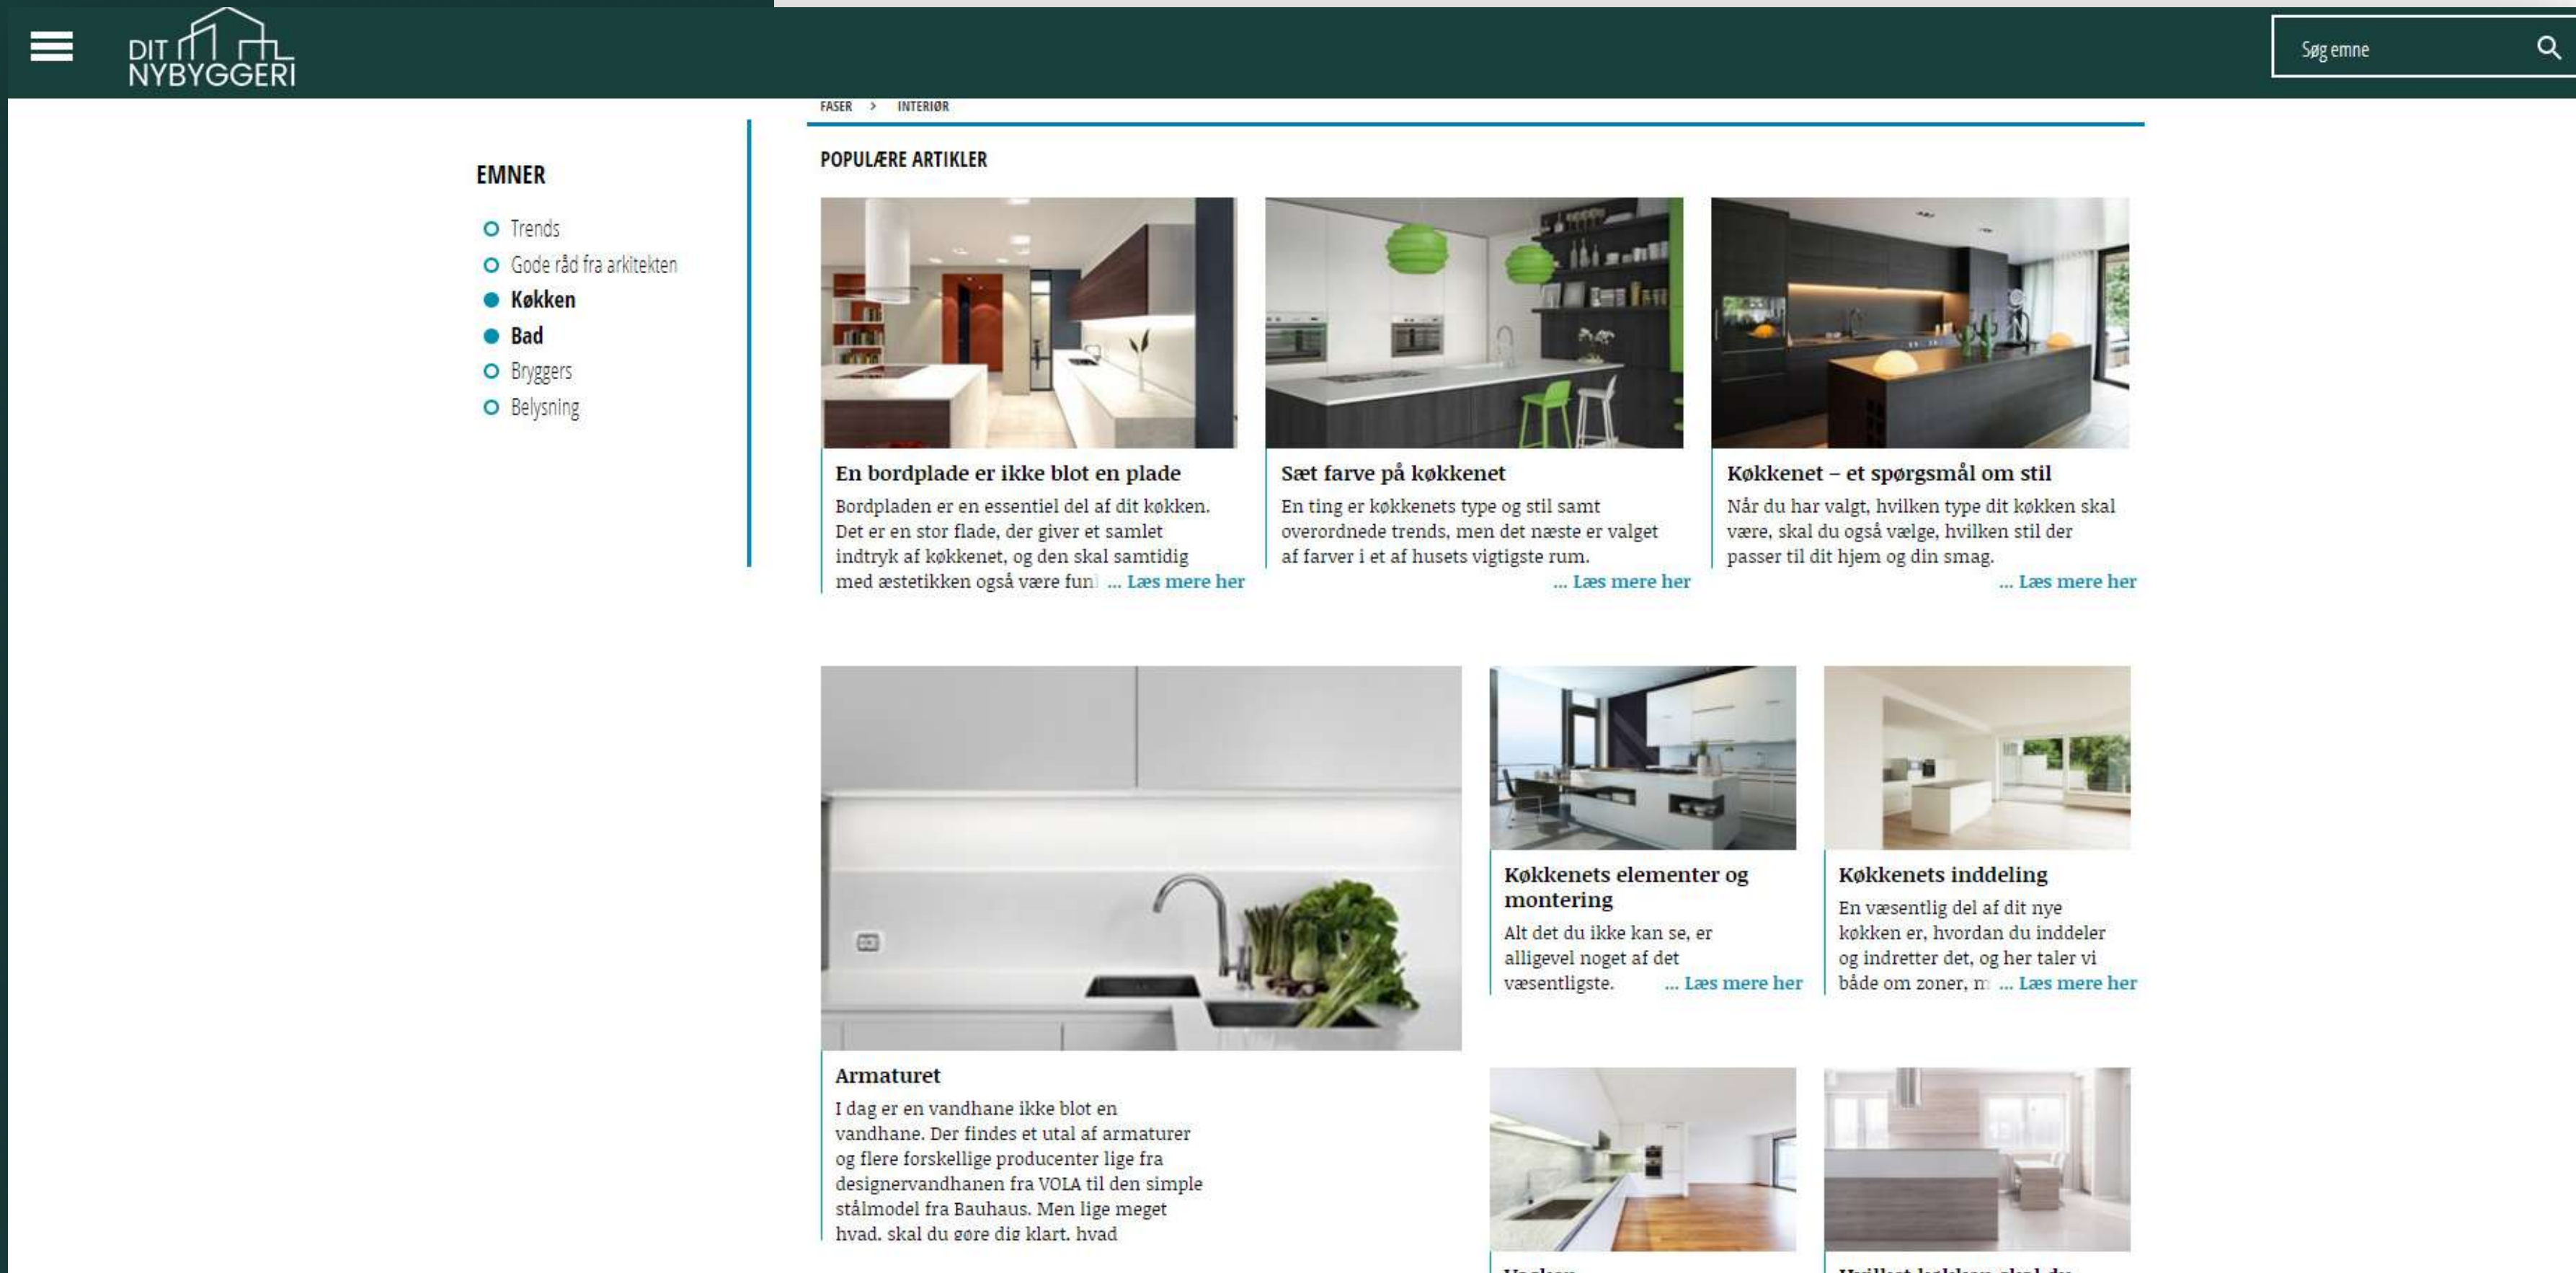

Challenge

The project is a web dashboard for a typical trader platform. It provides the ability to create a personal trader account, deposit funds into accounts, withdraw funds, exchange currencies, and make transfers between internal accounts. It also provides helpful trading tools, like a margin calculator and statistics analyzer. Security and high scalability are the main priorities.

DITNYBYGGERI

Client

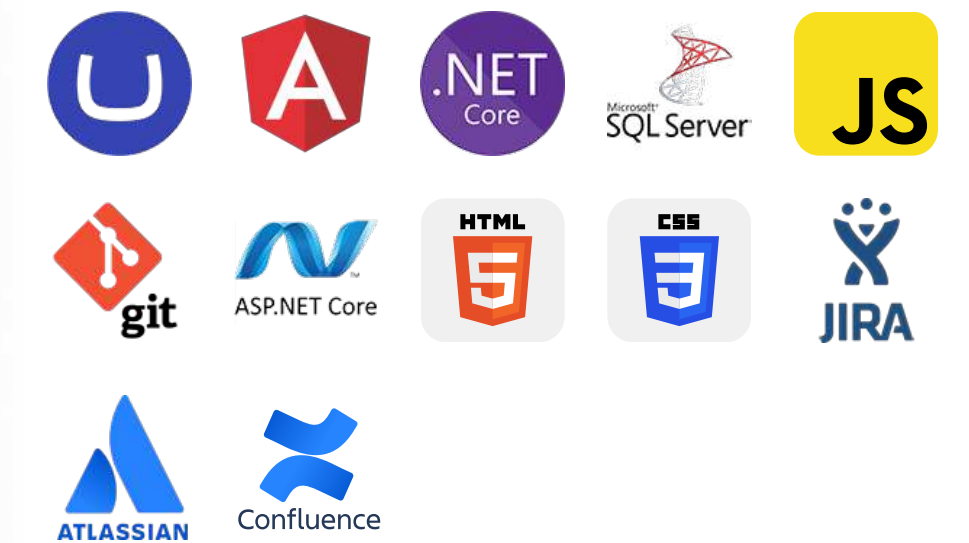

Ditnybyggeri.dk is an independent knowledge portal with the purpose of giving Danish settlers specific inspiration and knowledge to handle their own construction project in the best possible way.

Link

www.ditnybyggeri.dk

Technologies and tools:

Challenge

The client needed to build a knowledge-sharing platform dedicated to personal construction projects. The platform is a web catalog of instructions for construction projects. Users can also email their questions to the support team and discuss them on the forum. The website's content should've been managed through a popular .NET CMS system: UmbracoCMS.

ZEGOORO

Client

Zegooro offers insurance products against the existential risks in life at a very low price point.

Export table  Logout

Customers

Link

www.zegooro.com

Technologies and tools:

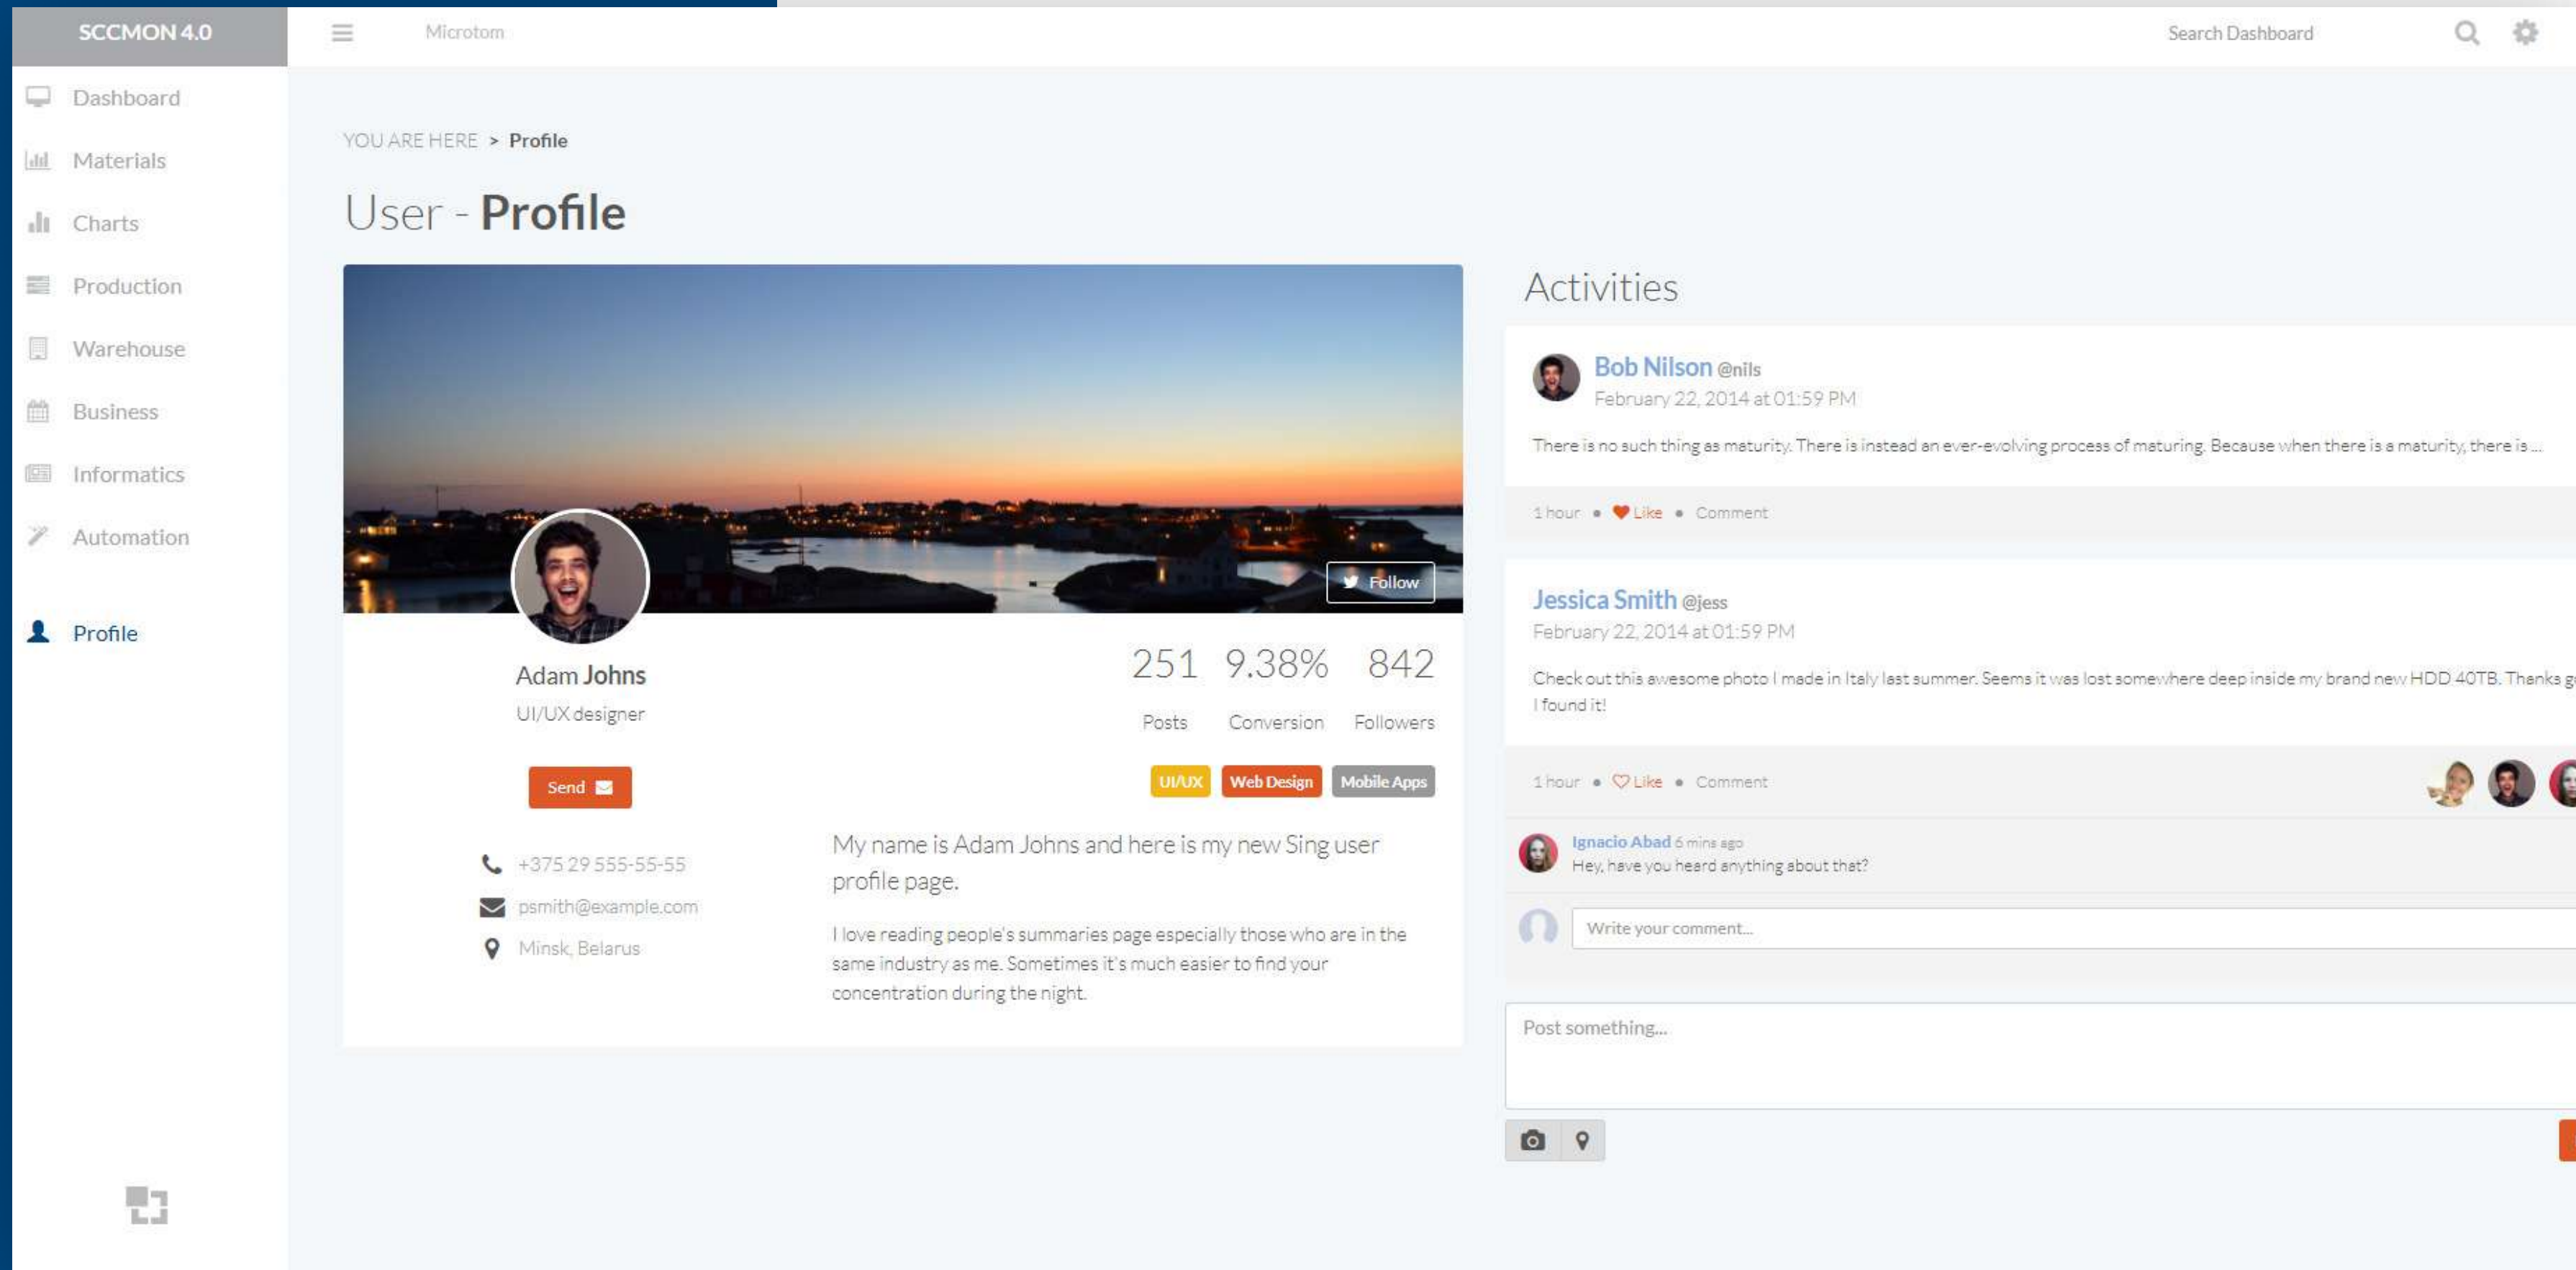

Challenge

It is a highly customizable multilingual insurance platform. It starts with an intuitive checkout process, including a subscription functionality, and supports different languages and localizations. It is SEO-friendly and integrated with a headless CMS system. Users can submit claims and upload necessary documents. Administrators manage subscriptions, contracts, and users from the Admin Dashboard.

MICROTOM

Client

MicroTom is a Switzerland based Information Technology Service provider company.

Link

www.microtom.com

Technologies and tools:

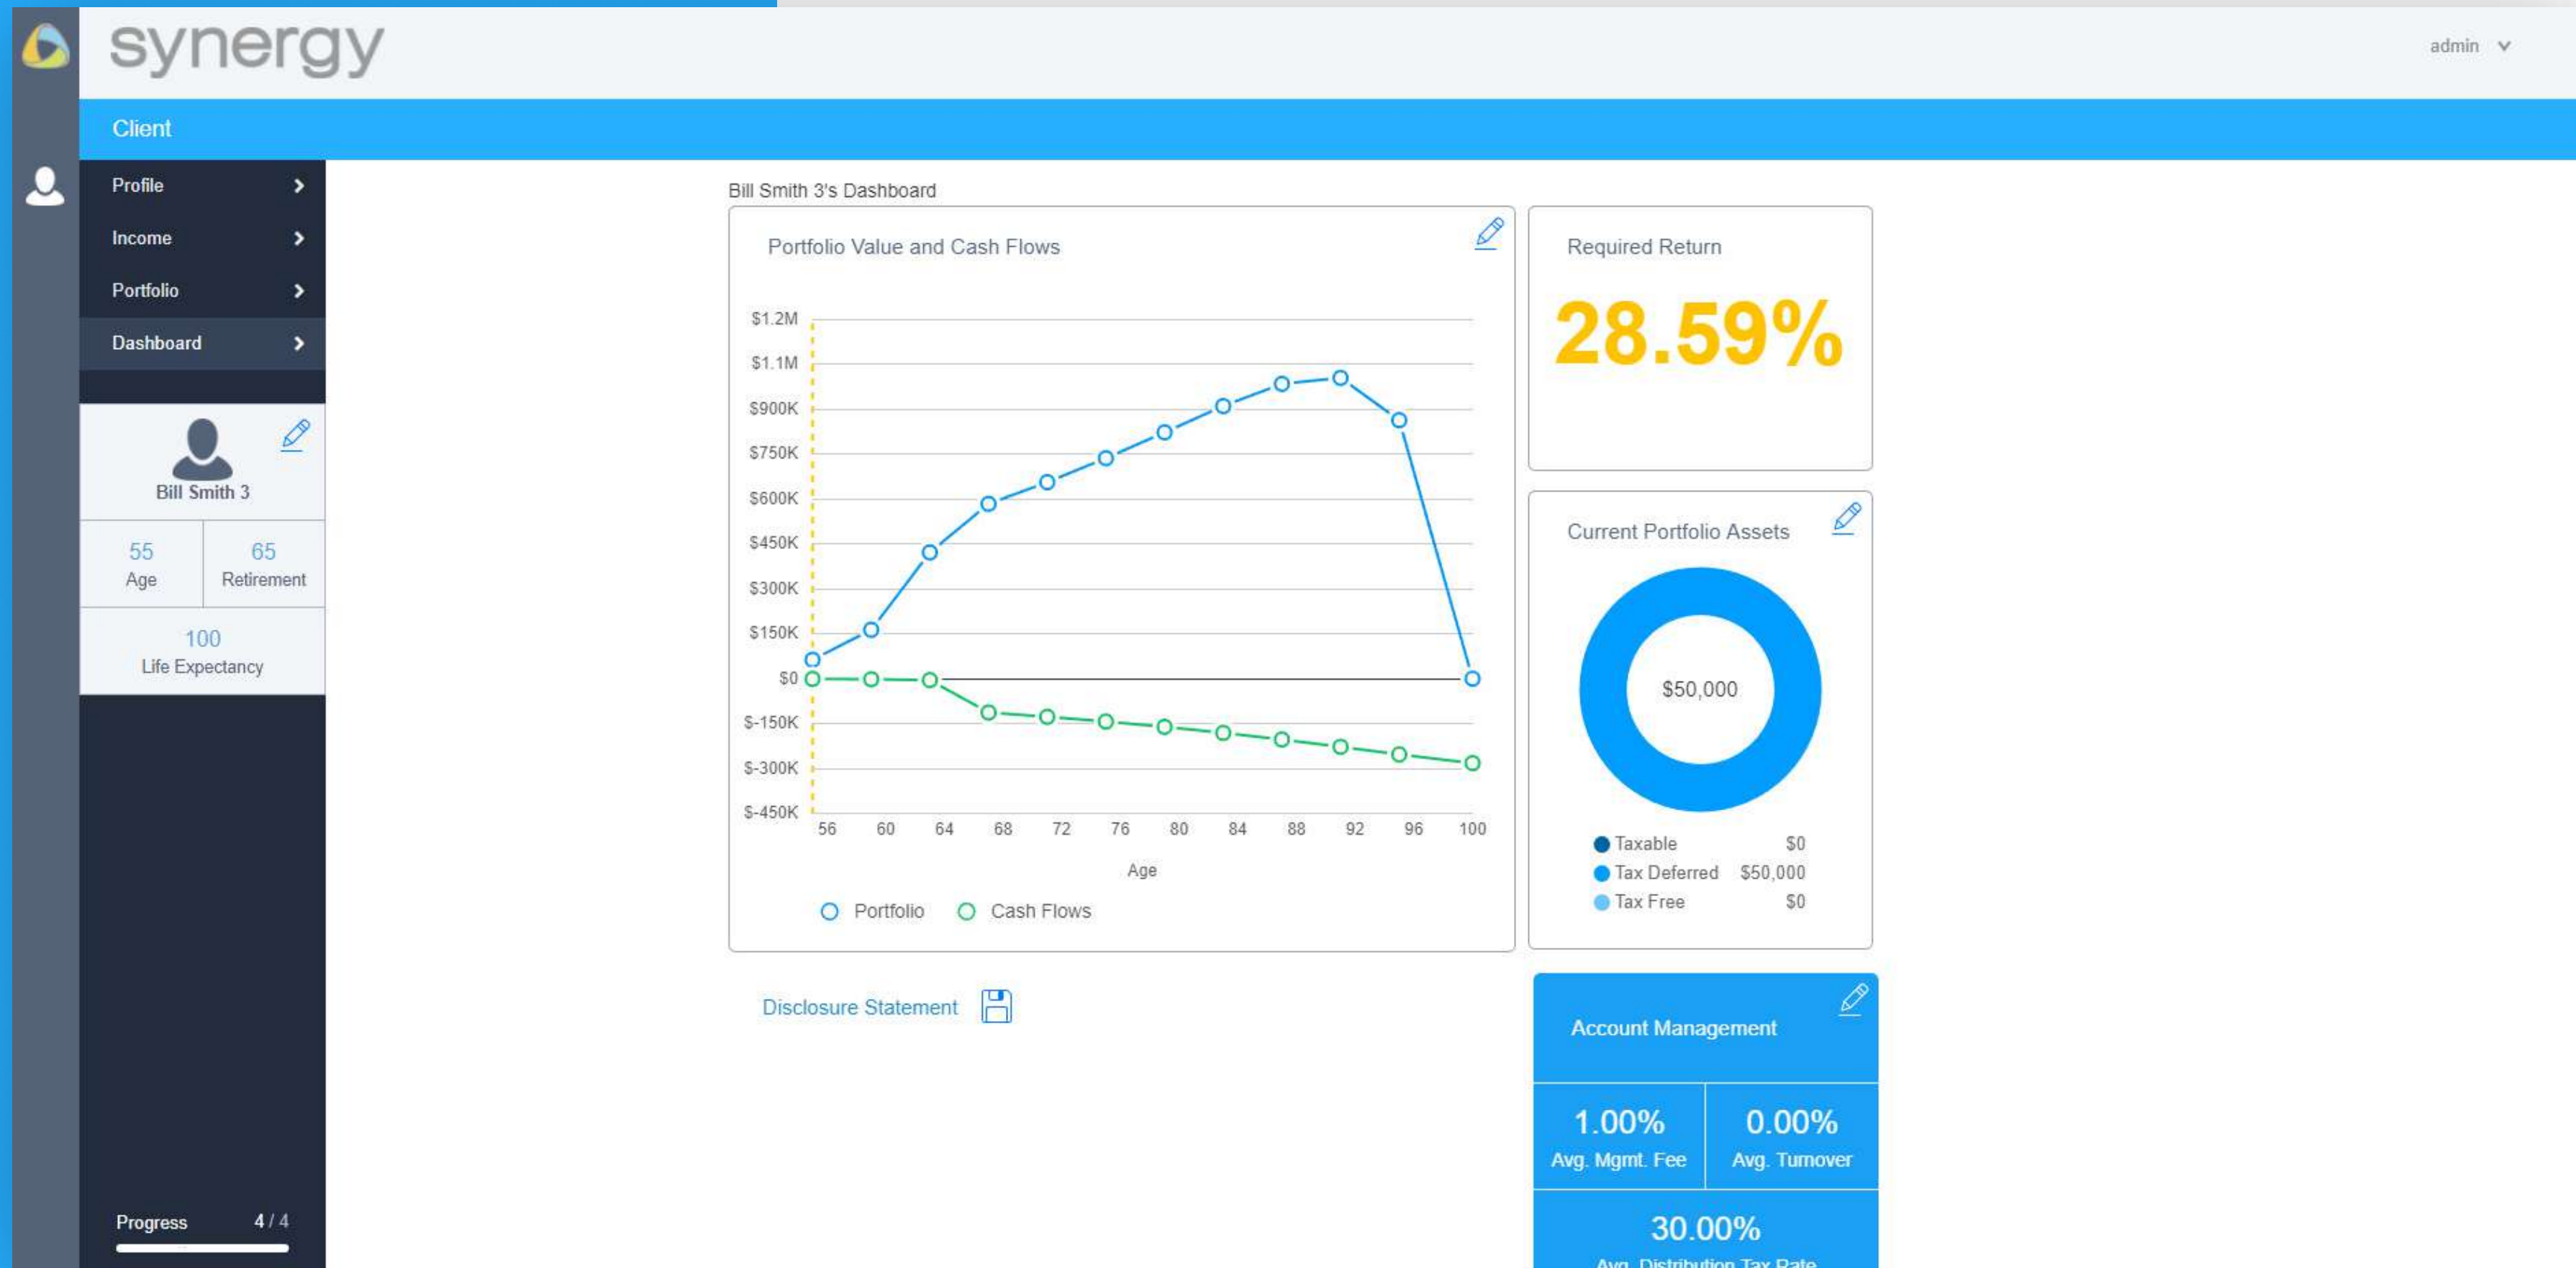

Challenge

Dev Team Inc was assigned to deliver a front-end implementation of the internal Dashboard for the client. The purpose of the Dashboard is to provide the ability for the system administrators to manage all available on-premises servers, devices, and the rest of the inventory. The design system has been developed according to the existing corporate brand identity and the provided brand style guide.

Client

Synergy Financial Management is an SEC Registered Investment Advisory firm headquartered in Seattle, Washington.

Link

www.synergy-ap.com

Technologies and tools:

Challenge

The client needed a responsive investment portfolio calculator built as a web app. This tool was the first step in the process of business automation and moving away from excel based data storage to a custom solution, which will allow the client to create necessary automation tasks and procedures in the future.

KTM COURIERS

Client

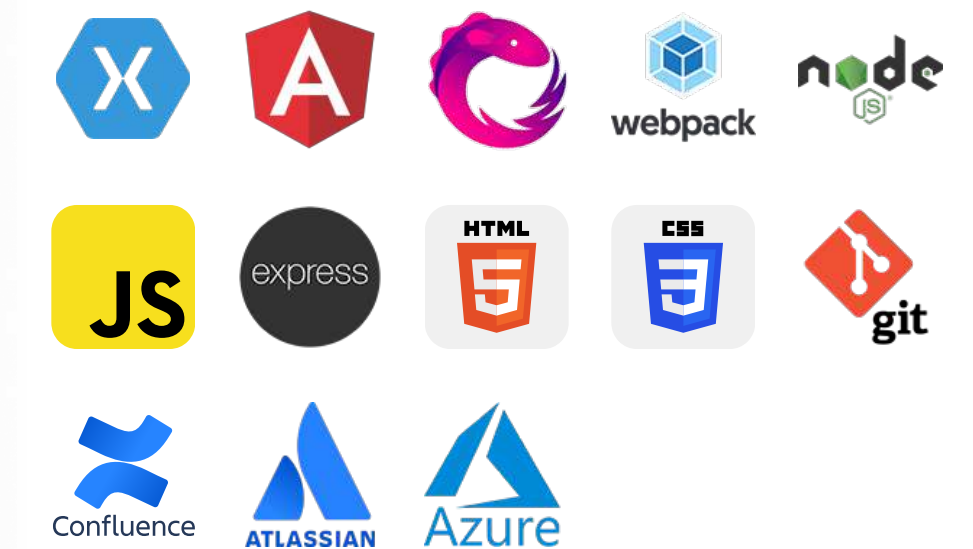

The client is a logistics company based in Sanepa, Lalitpur, Nepal. Their main specialization is a pickup and delivery of documents, letters, packages, clothes, bill payment, cash and other goods.

The screenshot shows the 'Users - Add Employee' form in the KTM Couriers web portal. The form is divided into three main sections: User Details, Customer Details, and Employee Details. The User Details section includes fields for Username (with a red error message 'The username is required'), Password, Email, Is active (checked), and Access Level (Location Manager). The Customer Details section includes fields for Suffix (Mr.), First Name (Dmitry), Last Name (Bezzubekov), Primary Phone (Cell), Second Phone (Home), Address Type (House), Address Line, Locality, Zone (Bagmati), District, and Address Note. The Employee Details section includes fields for Citizenship Num (d, with red error messages 'The citizenship number is only numbers.' and 'The citizenship number is not valid.') and Hire date (Choose date). The form has 'Add' and 'Cancel' buttons at the bottom right.

Link

www.ktmcouriers.com

Technologies and tools:

Challenge

The project is a web portal for couriers and delivery managers to manage the company's delivery processes. The Web Portal allows customers to place their orders for delivery and view order statuses in real time. The Control Panel allows employees to assign new orders for delivery, change order status, and add new employees or customers to the system.

VIOS

Client

VIOS Network is an attempt to organize and categorize unstructured data of the Internet and provide a filter-based search engine for information on the Internet with the help of a growing community.

The screenshot shows the VIOS search engine interface. The search bar at the top contains the text 'carcar'. Below the search bar, there are several tabs: 'Collection', 'Compose', 'Edit', 'Launch', 'Discover', 'Alt', 'Pair', and 'Subscribe'. The 'Collection' tab is active, showing a list of 15 items related to 'carcar'. The 'Categories' tab is also active, showing a list of 51 categories. The main content area displays the search results for 'carcar', including a table of fields and content.

FIELD	CONTENT
library	http://dbpedia.org
owl:sameAs	Q
skos:prefLabel	People from Carcar
rdfs:label	People from Carcar
skos:broader	People by city in the Philippines
	People from Cebu
	Carcar

Technologies and tools:

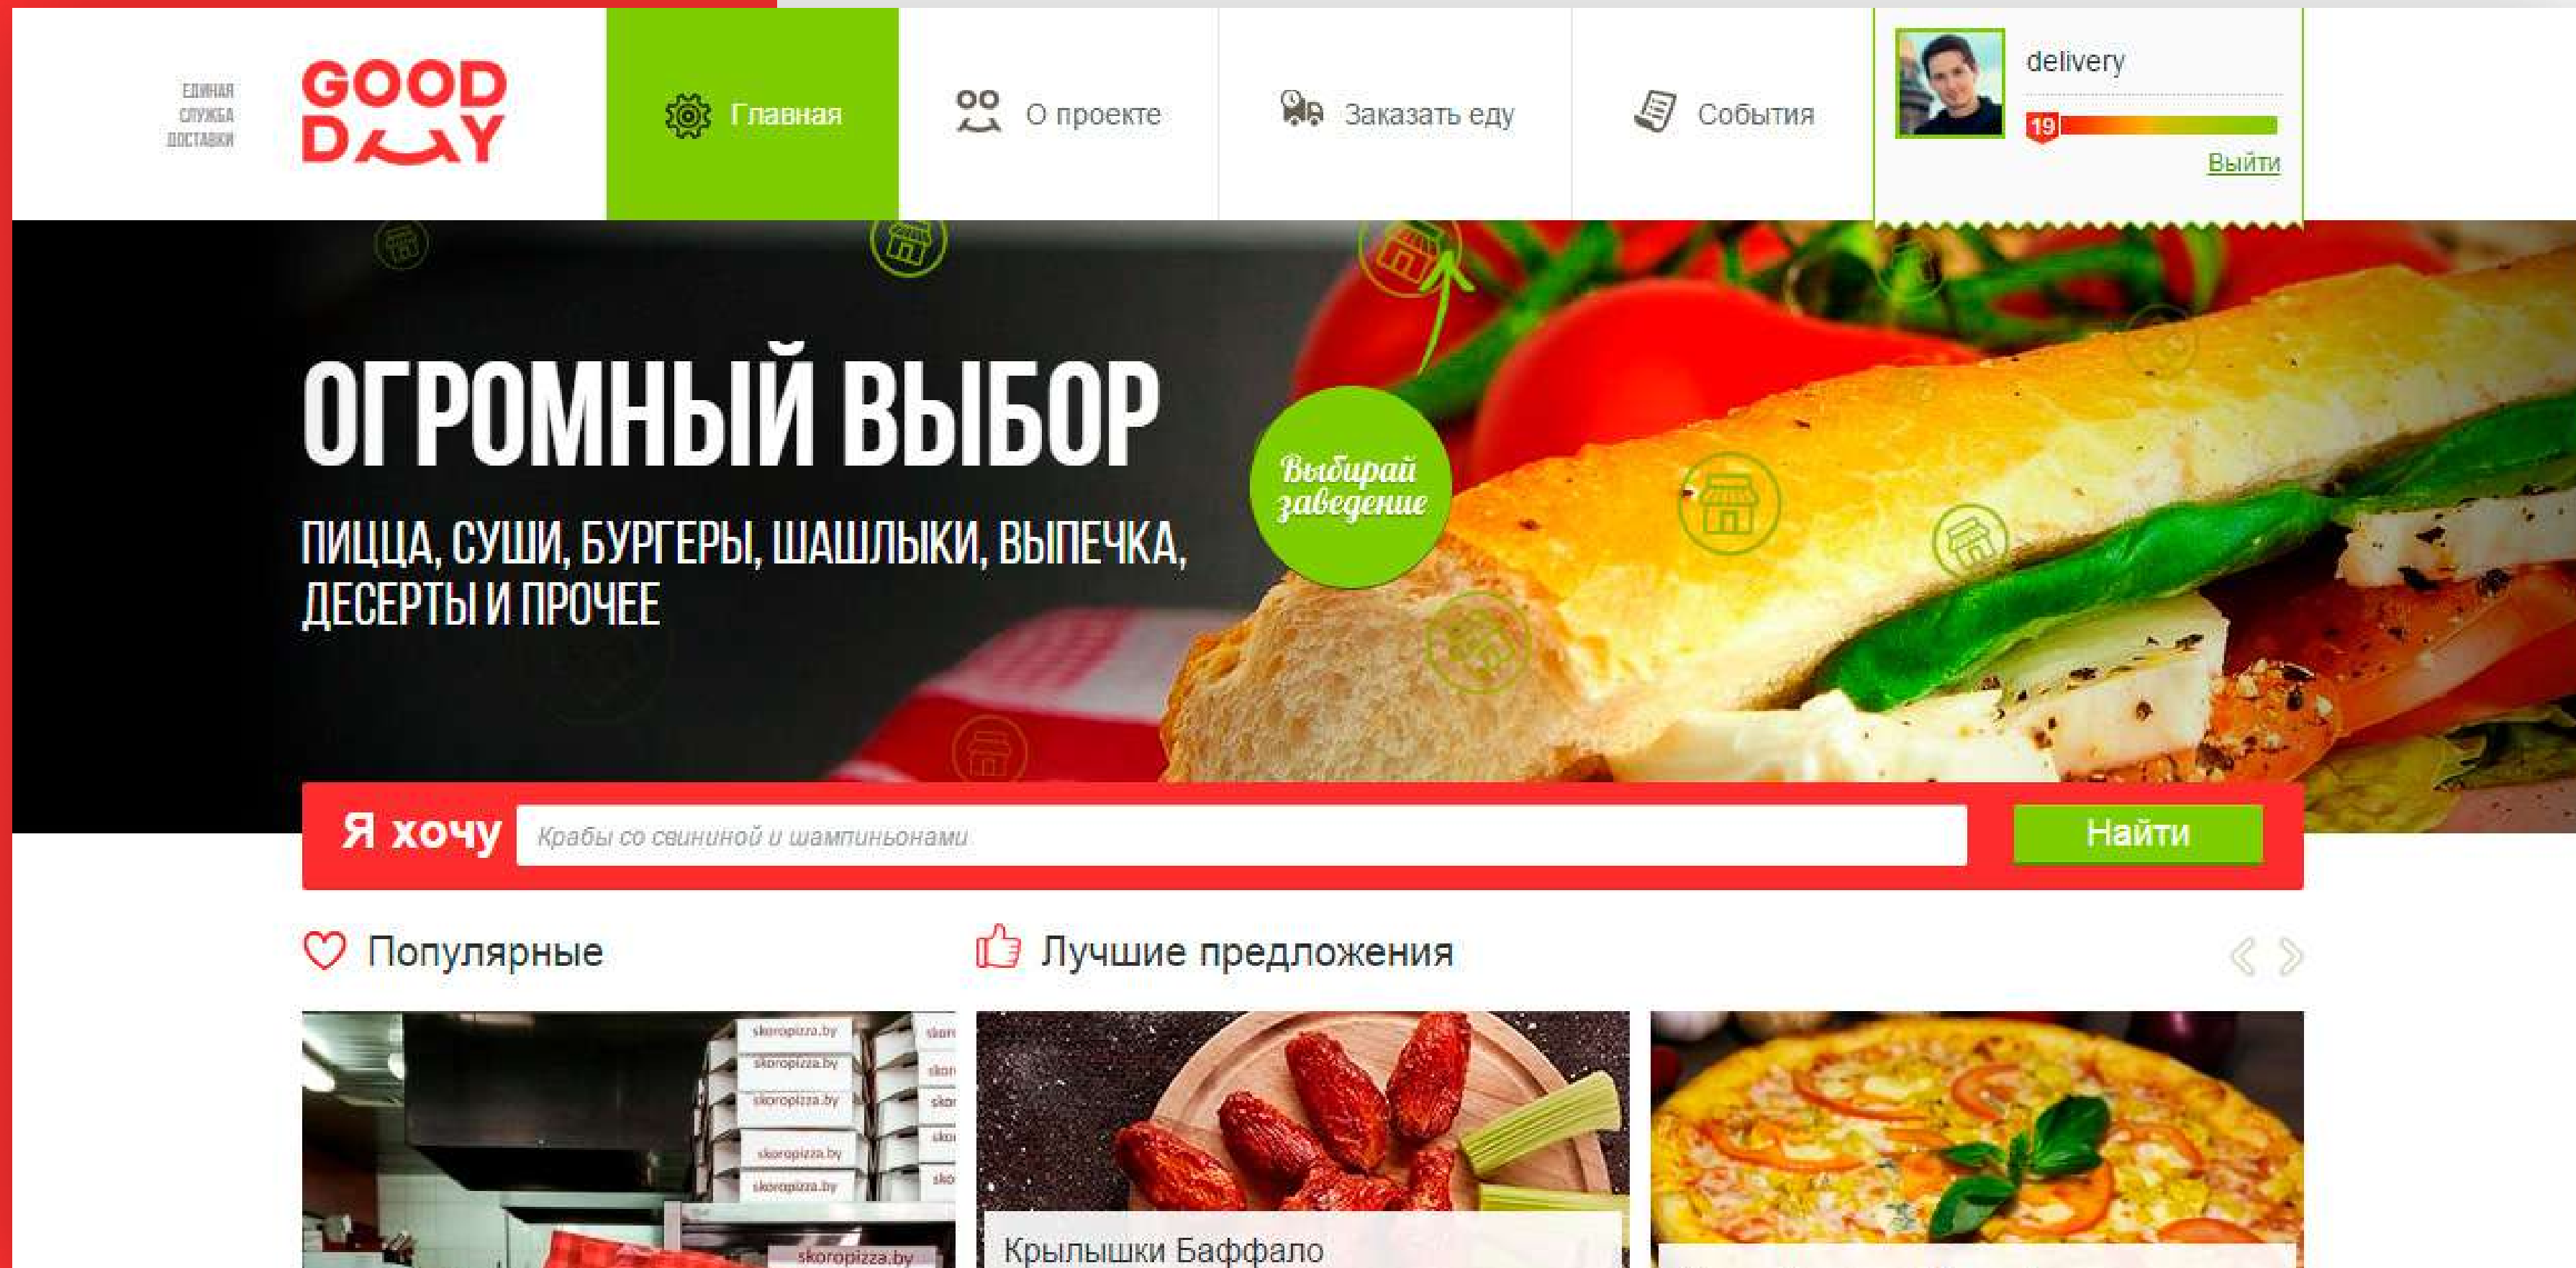

Challenge

VIOS is an attempt to resolve the problem of "Web query classification" on the Internet. It's a search engine that uses multiple independent APIs behind the scenes and connects responses from them to categorize unstructured data on the Internet. Users can participate in content structuration as a part of the community and be rewarded with cryptocurrency tokens.

GOOD DAY

Client

Good Day is an online and mobile food ordering and delivery marketplace that connects diners with local takeout restaurants in Minsk, Belarus.

Technologies and tools:

Challenge

The challenge was to implement 4 different applications for food delivery from different restaurants in the city: a web application to accept online orders, a web application for administrators of restaurants to receive and process the orders, a mobile application for users who prefer mobile ordering experience over the web, and mobile application for couriers to track orders and update order statuses.

NUTHEORIE

Client

Nutheorie is a driving course provider in Netherlands.

Link

www.nutheorie.nl

Technologies and tools:

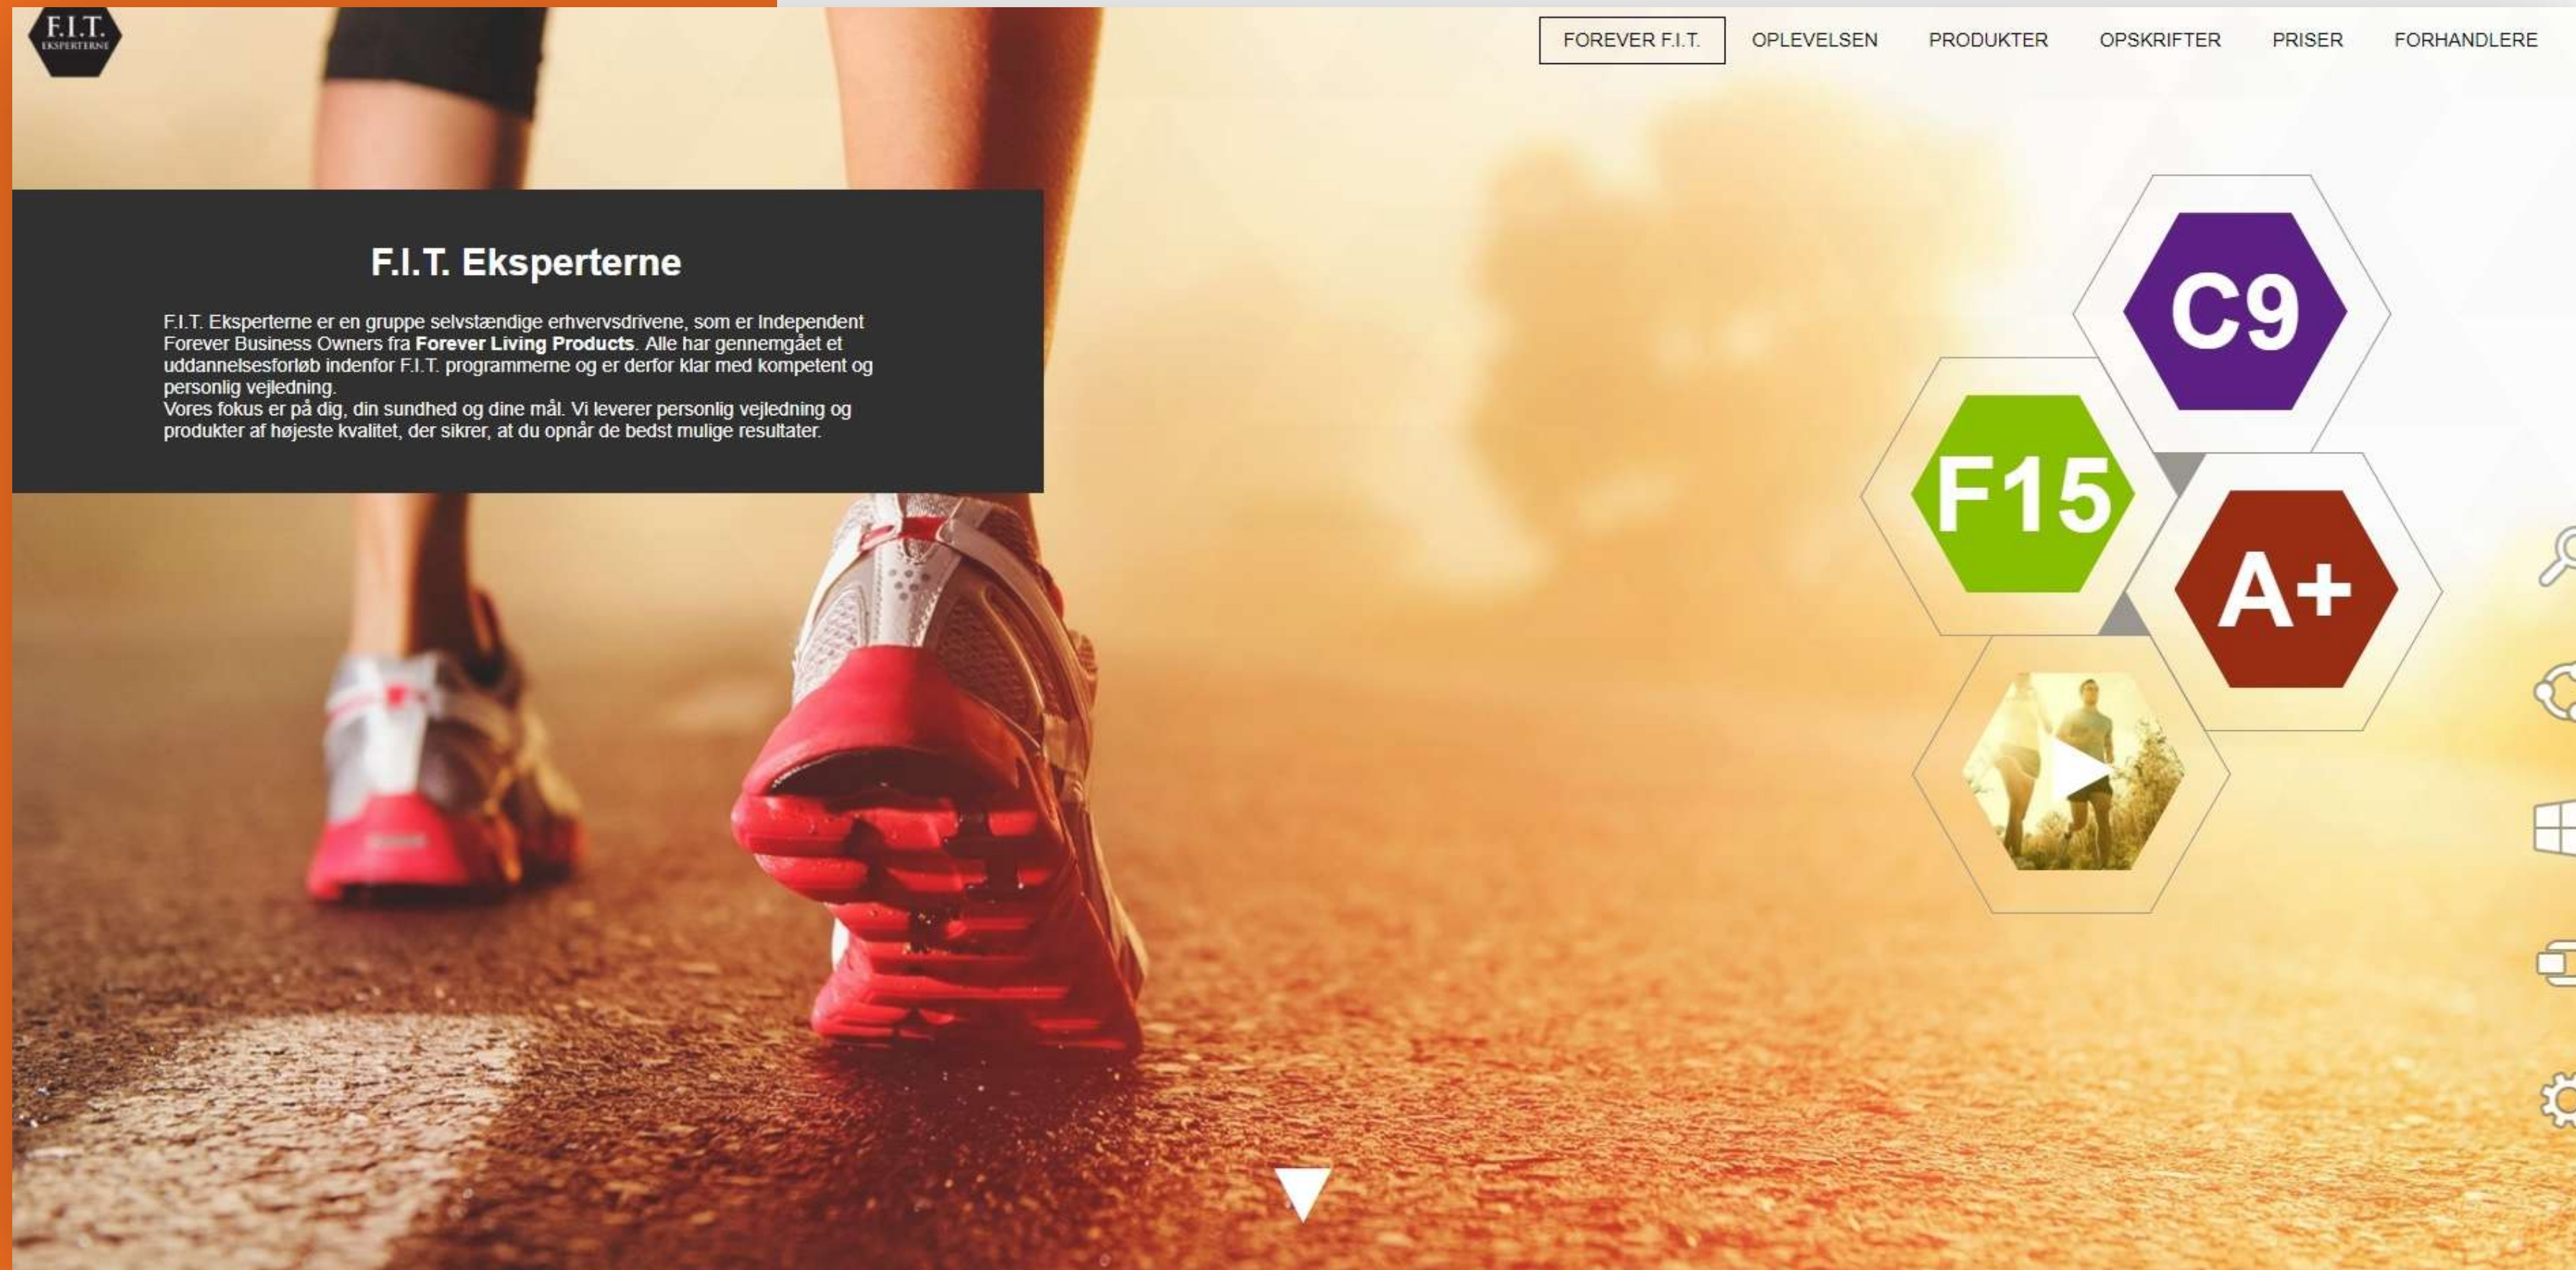

Challenge

The client needed a web platform for driving courses. It is a marketplace of services that the company provides across the country. Customers can sign up for the system, choose classes based on location, find all necessary documents and information about courses and teammates, and leave feedback. And administrators can manage customers through a secured admin dashboard.

FIT EKSPERTERNE

Client

Forever Living Products is an American privately held multi-level marketing company based in Scottsdale, Arizona, which manufactures and markets aloe vera-based drinks and bee-derived cosmetics, dietary supplements, and personal care products.

Link

www.fit-eksperterne.dk

Technologies and tools:

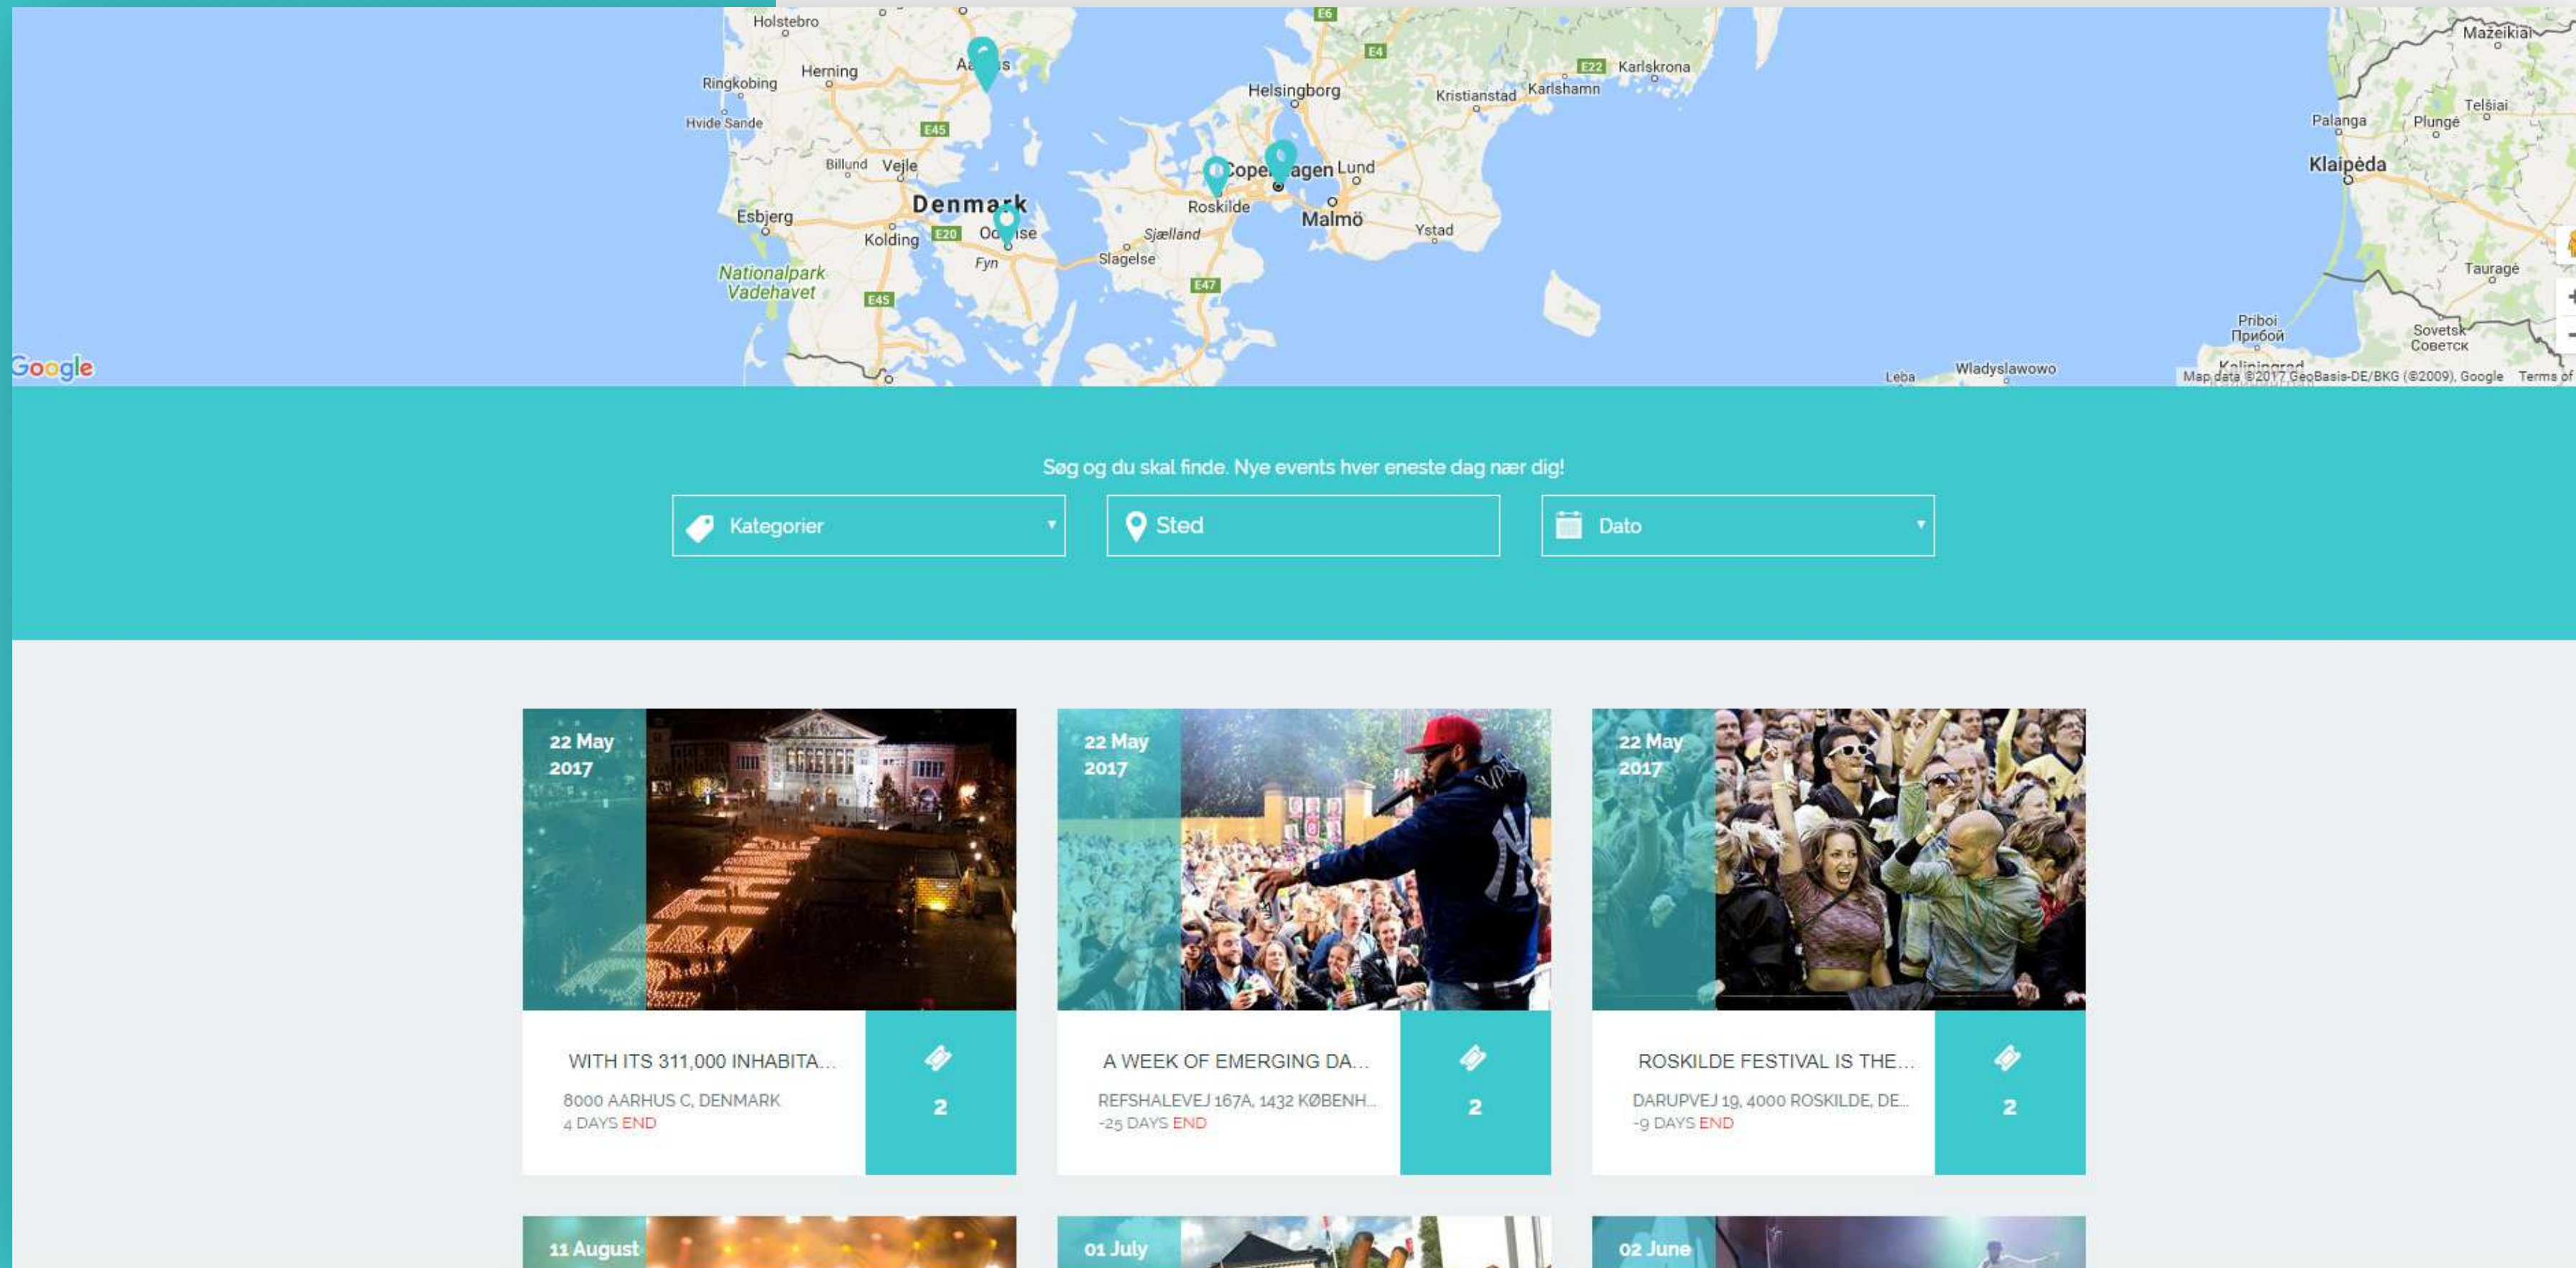

Challenge

The client needed a web-based platform for its independent distributors in Denmark. The platform is a marketplace for client products that are available in Denmark. Platform users can find the closest distributors with available products in stock. The website's content is a list of available distributors and their locations and available products in stock, which are manageable through the CMS.

EVENTIKA

Client

Eventika is an online calendar and events discovery service owned in Denmark. The service allows users to search for and track upcoming entertainment events in the area (such as concerts, festivals, and film presentations).

Technologies and tools:

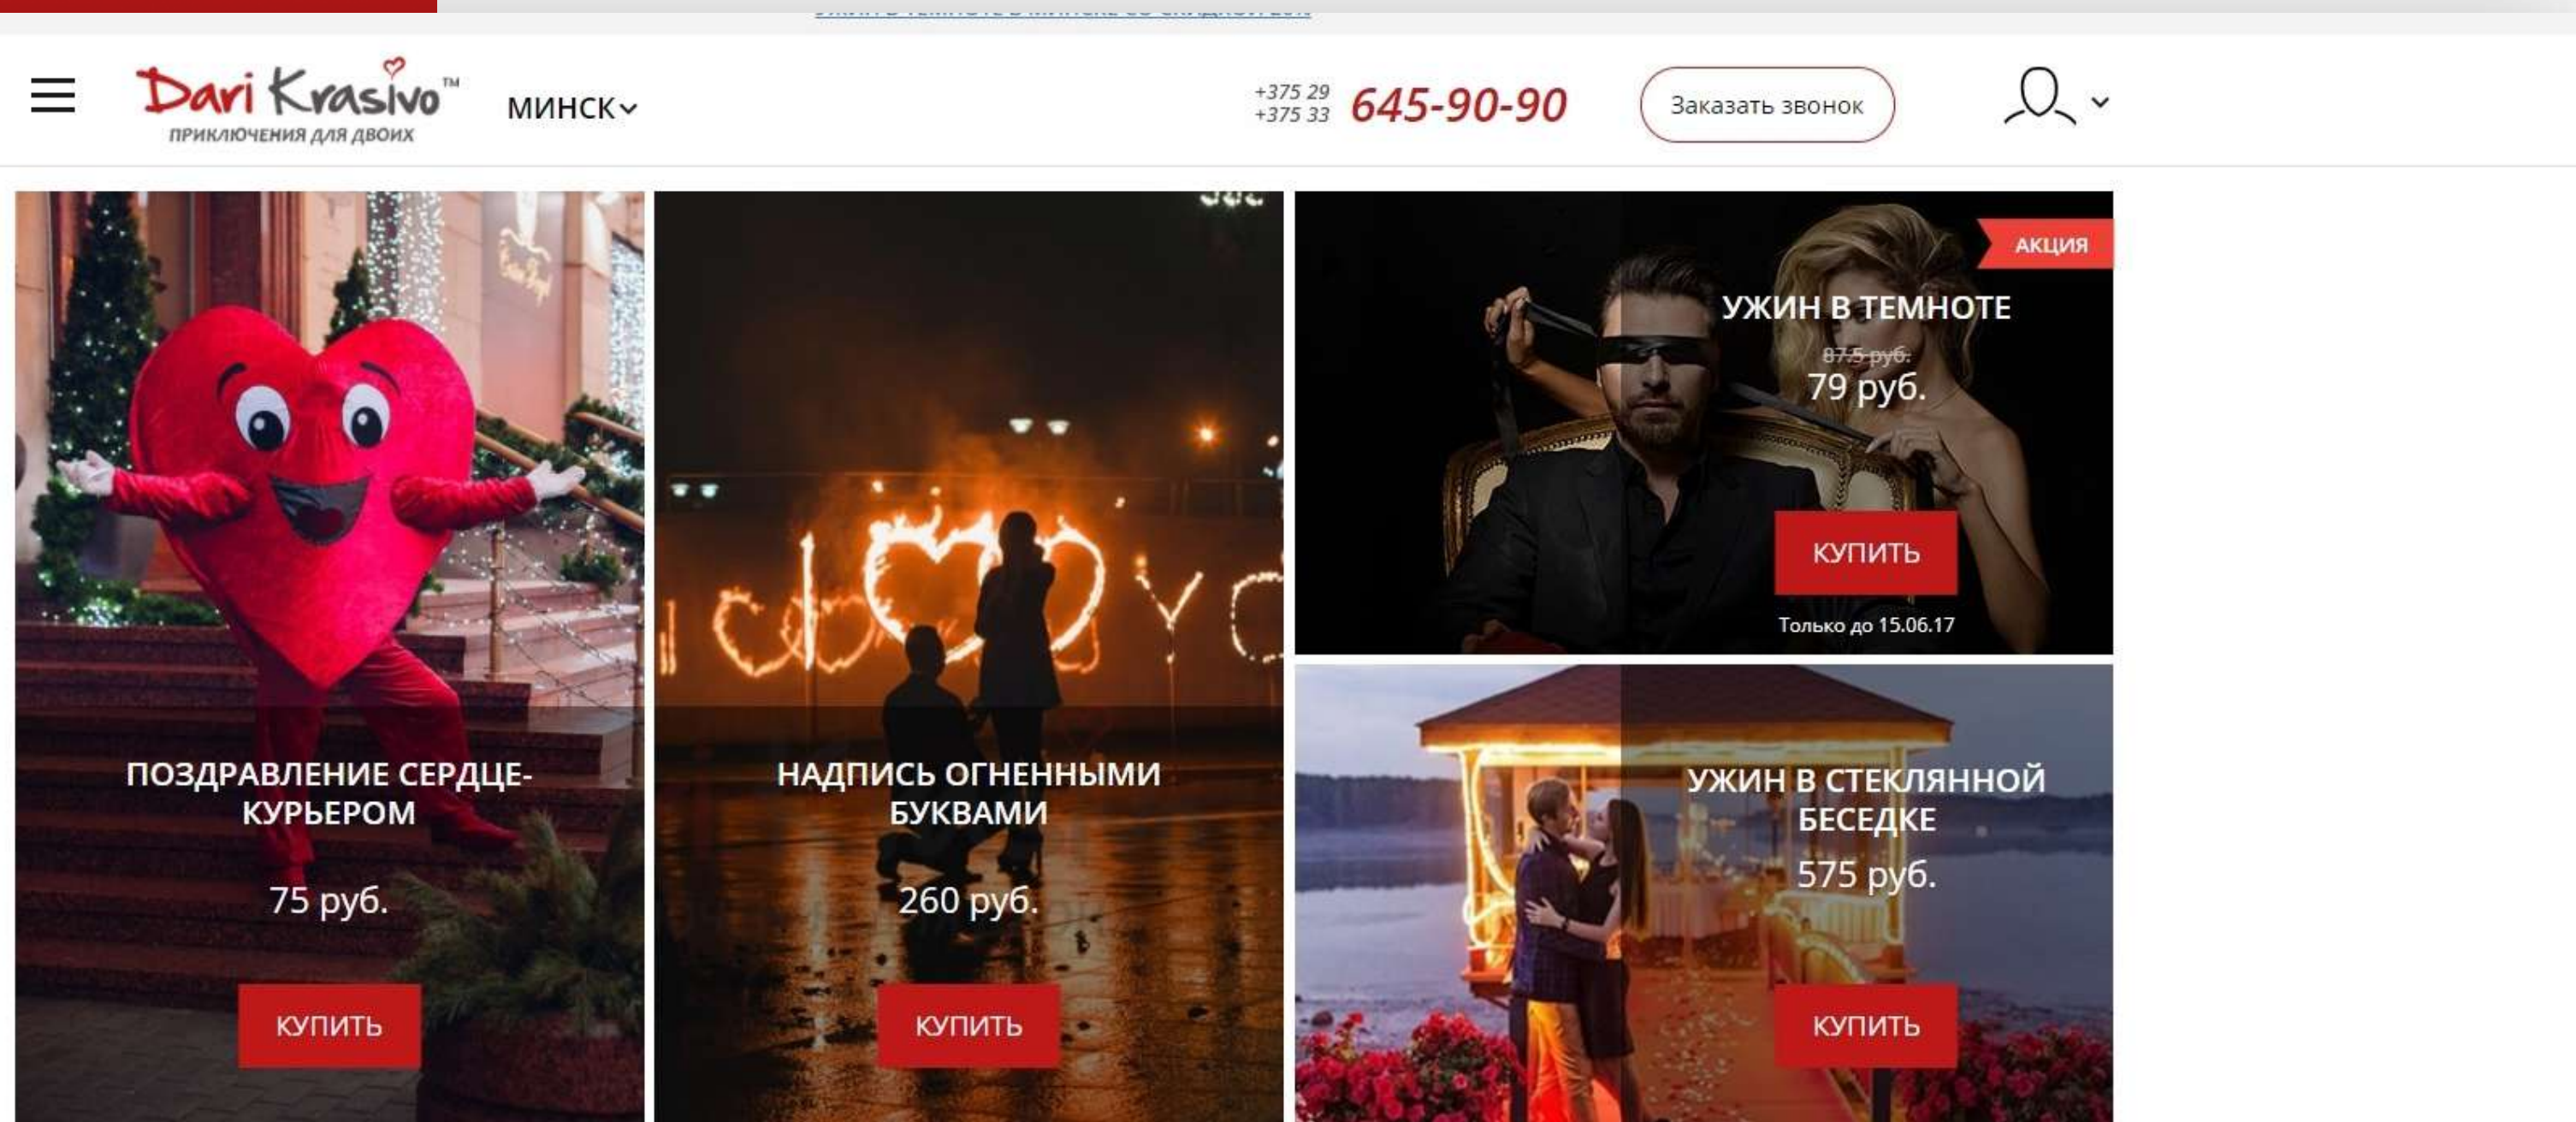

Challenge

The client is an event-based portal in Denmark and needed its website to be redesigned and integrated with a CMS. All currently available events needed to be migrated into the new CMS. The CMS manages all available events, adds, edits, removes, or temporarily hides portions of the website's content, and provides the best possible SEO.

DARIKRASIVO

Client

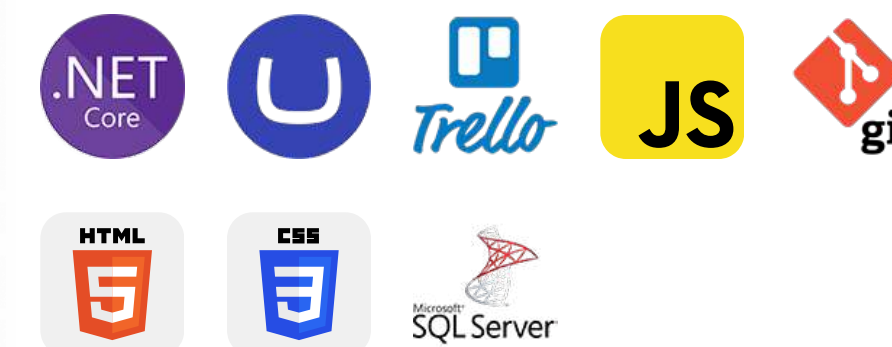

DariKrasivo is a romantic dates and events service provider in Minsk, Belarus.

Link

www.darikrasivo.by

Technologies and tools:

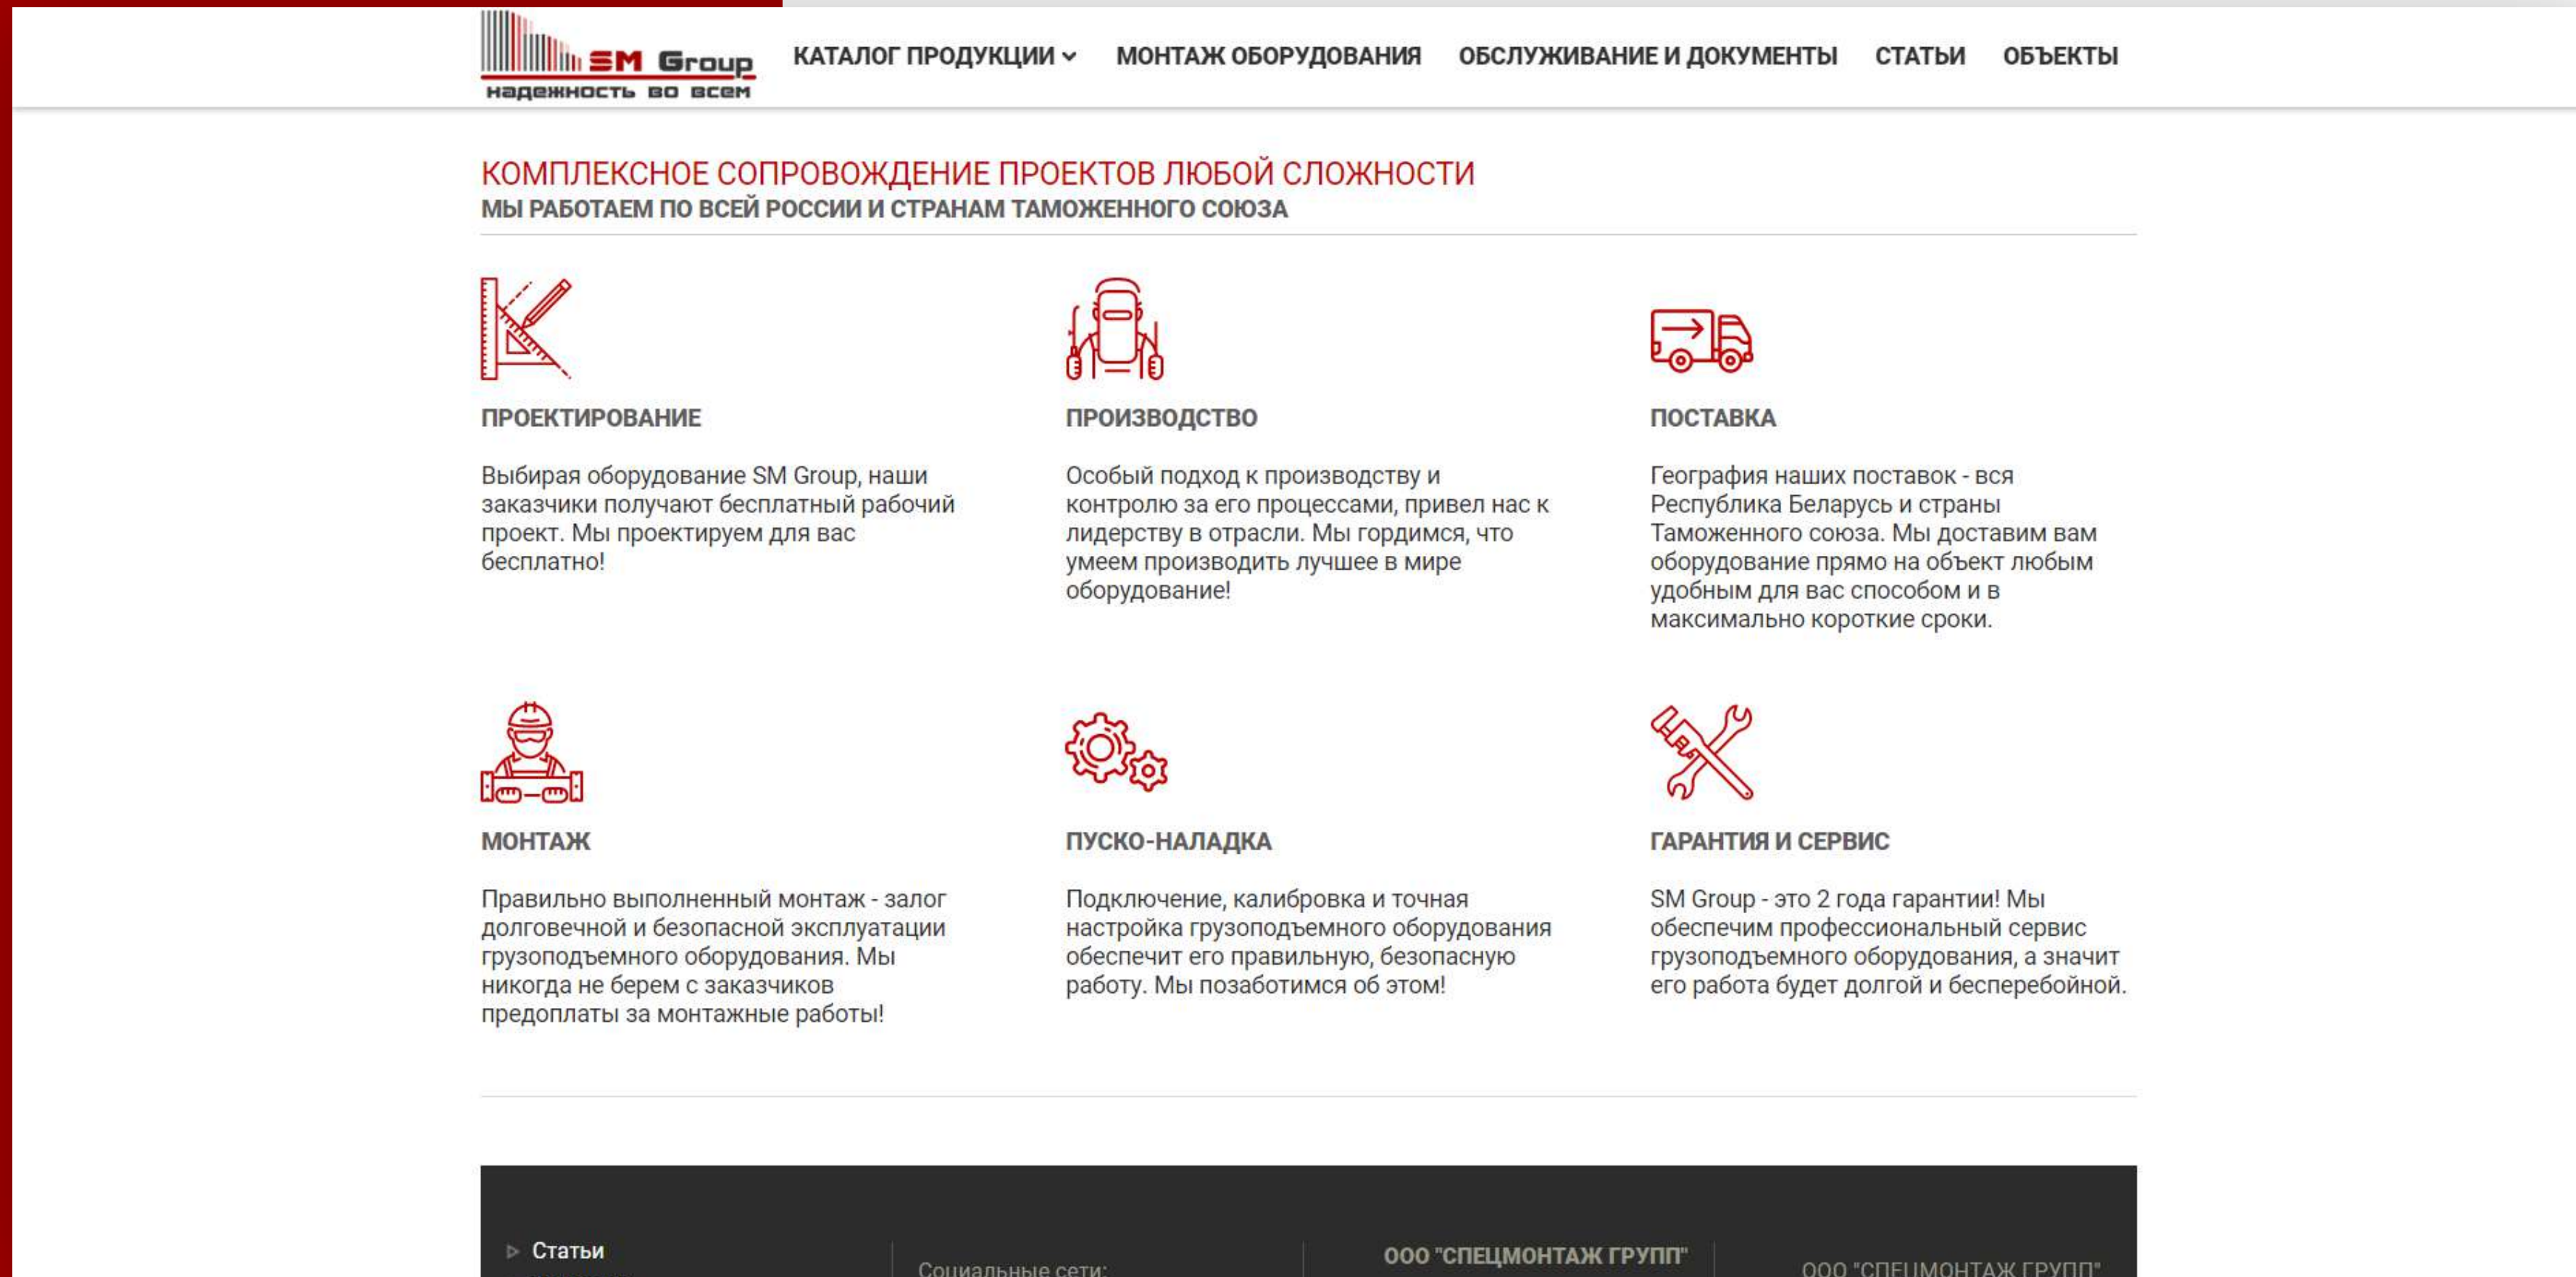

Challenge

The client needed a website for their dating platform. One of the requirements was a clean and simple UI/UX with a custom design, perfect SEO optimization capabilities, and Content Management System for the business. The crucial requirement was to minimize development and maintenance costs as much as possible.

LIFTMONTAZH

Client

Liftmontazh is a construction company with a main specialization in the installation of lifting equipment located in Minsk, Belarus

Link

www.liftmontazh.by

Technologies and tools:

Challenge

The client needed a customer-facing company website with the ability to edit the content of the website. The client also provided custom design requirements. The main challenge of the project was the minimal budget that we were working with and, therefore, the limited resources available during the implementation.
