**John Doe**  
SomeCompany LLC.

“ We have been working with Dmitry for several years so far and I am more than happy about these relations. Dmitry and his company Dev Team is our partner responsible for custom Javascript development. They are true professionals in this field and have always delivered what was expected from them and on time. Also the process of working with Dev Team is very transparent and feels more like an internal team rather than remote partner. So basically, I am absolutely confident recommending them as a development partner! ”

**Leslie Alexander**  
SomeCompany LLC.

“ Dmitry provided expert level code and architecture which surpassed expectations. His solutions were consistently superior to what you could expect from such a new developer. All of the quality work he delivered was future proofed, intelligently designed, and easily reusable. Dmitry is also exceptionally reliable, willing to help when needed, and an expert communicator. Dmitry helped contribute to the success of other developers by always being ready to share information and explain his code. Dmitry and his team will be a tremendous resource for your company. ”

**Esther Howard**  
SomeCompany LLC.

“ The major issue with hiring external programmers is the uncertainty of work quality. Many projects are run by inexperienced project managers, startups or private persons. They wouldn't be able to see the difference between bad or good code. Well, I can testify that the Dev Team produces excellent code and we are so pleased with the Umbraco websites they have produced for us! With our own Danish team of programmers, the code have been looked thoroughly through and tested. We are on our 3'rd website with the Dev team and we have never been disappointed with the quality of work or the communication. Both so important in webdevelopment. ”
